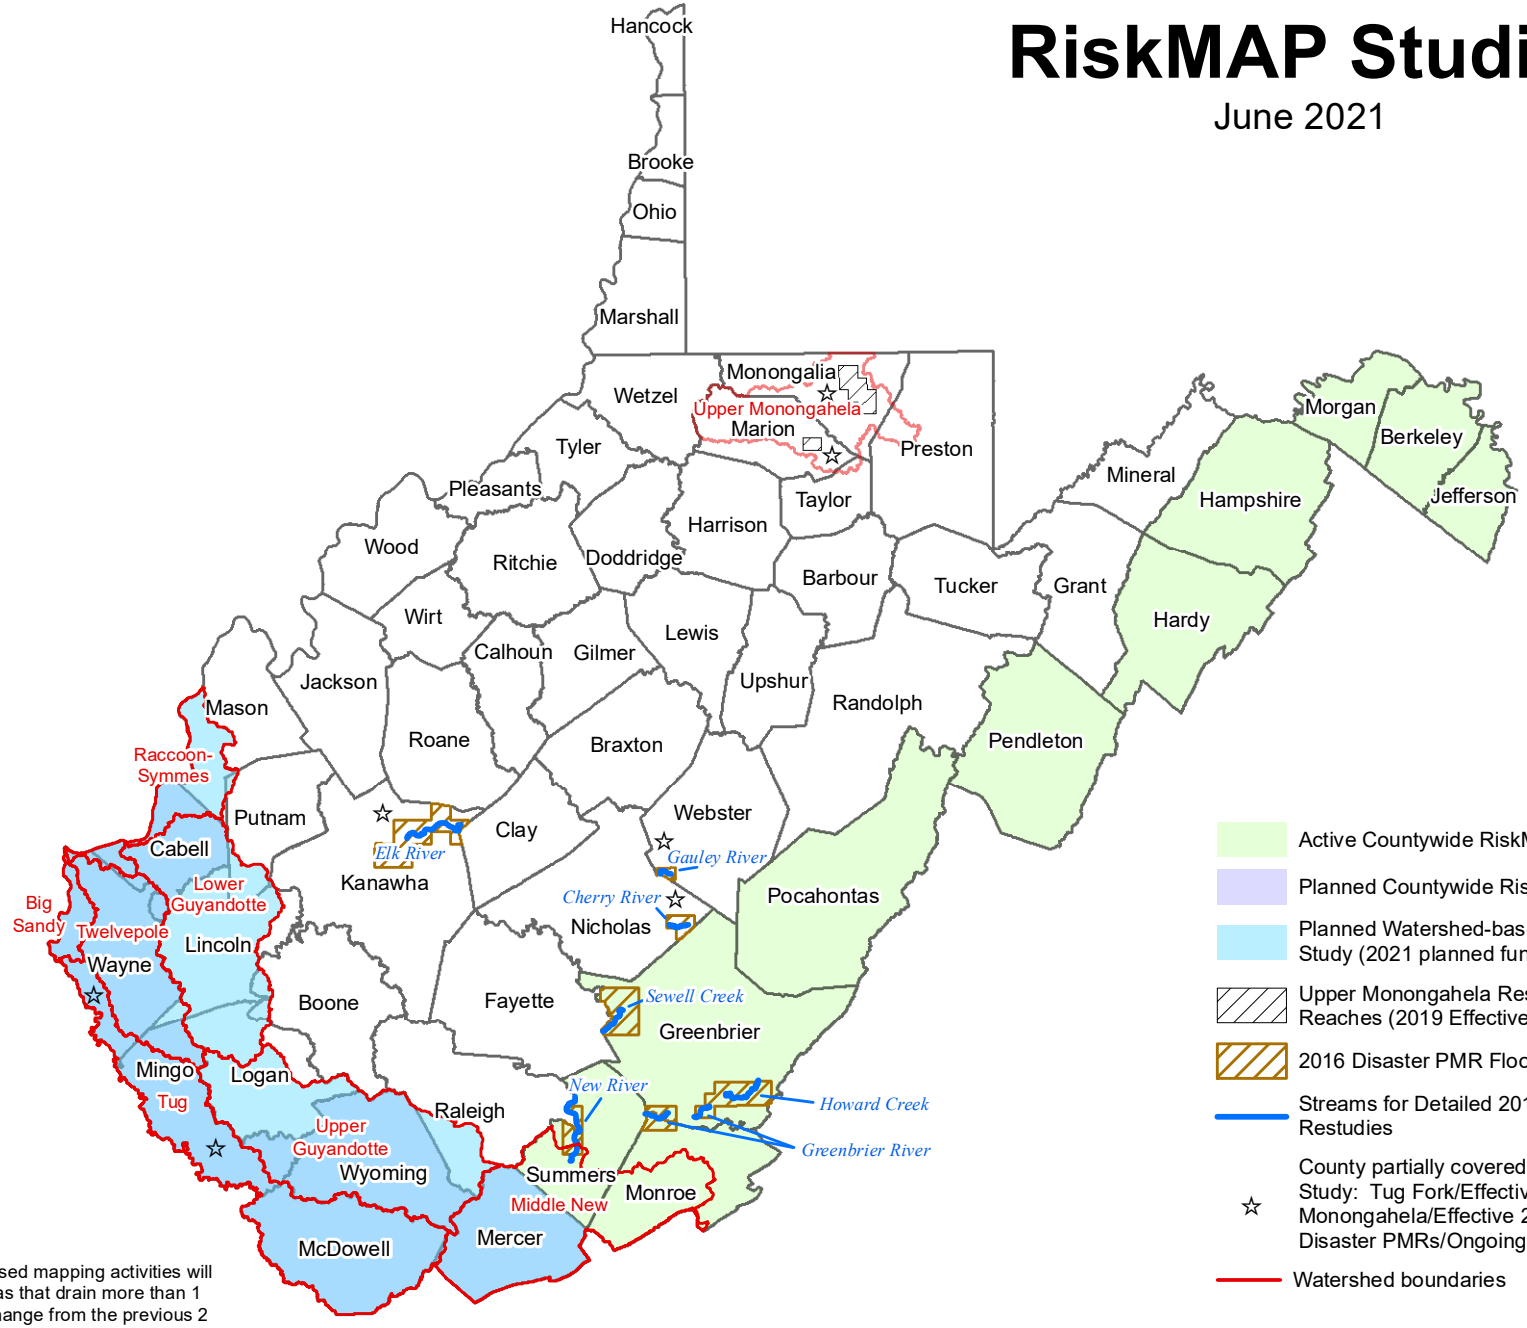
# Active and Planned RiskMAP Studies

June 2021



Active Countywide RiskMAP Study

Planned Countywide RiskMAP Study

Planned Watershed-based RiskMAP Study (2021 planned funding)

Upper Monongahela Restudy Stream Reaches (2019 Effective FIRMs)

2016 Disaster PMR Flood Reaches

Streams for Detailed 2016 Disaster Restudies

☆ County partially covered by RiskMAP Study: Tug Fork/Effective 2016; Upper Monongahela/Effective 2019; 2016 Disaster PMRs/Ongoing

Watershed boundaries

All the new watershed-based mapping activities will study any unmapped areas that drain more than 1 square mile, which is a change from the previous 2 square mile watershed drainage threshold. This will result in newly mapped A Zones in the SFHA for certain communities.
