

Quick Verification Guide

HAZARD IDENTIFICATION: Provide shared map links of any flood map errors or unmapped landslides.

ESSENTIAL FACILITIES: Confirm essential facilities in high and moderate risk floodplains. Table 2.

MISSING STRUCTURES: Submit map links of missing noteworthy structures in the high-risk floodplain, especially those of significant importance to the community. Table 3 lists all structures inventoried.

HIGH-VALUE STRUCTURES: Confirm high-value residential and non-residential buildings for correctness. Table 4.

HIGH-RISK STRUCTURES: Review structures at greatest flood risk: high damage dollar costs (> \$10,000), substantial damaged estimates (> 50%), and Post-FIRM minus-rated structures (lowest floor 1 ft. or more below Base Flood Elevation). Tables 5 & 6.

MITIGATED PROPERTIES: Provide Elevation Certificates (Building Diagrams 5-8) and Building Pictures of residential (elevated > 5 ft.) and non-residential structures, especially those buildings identified at high risk. Verify all deed-restricted buyout properties are shown on WV Flood Tool. Tables 7 & 8.
