

Repetitive Loss Structures

Site or Street Address Matched = 2,292

November 2021

Notes: Address Matching (Geocoding) of RL Structures

Of the 3,132 RL structures in the state, after clean-up and editing, only 73% have addresses that can be geocoded (address matched to x,y coordinates) by a house number or street. 54% (1,679) of the total RL structures were site address matched and 20% (613) were street matched.
