

SUBJECT: GEO Precinct 114 Mismatch Errors – Spatial Data Assessment

4/8/2022

- A minimum of 123 Voters in SVRS Precincts (105, 106, 107, 109, 111, 112) *mismatch* with GEO Precinct 114
- Voters correctly assigned to Precinct 114 are in State House District 34 and not House District 36.

Significance: Many Voter Points located in the newly redistricted Precinct 114 in northwest McDowell County appear to be assigned to the wrong precinct and state house district. Consequently, these SVRS-GEO precinct mismatches could result in the voters in this location receiving the wrong ballot for the House of Delegates.

Validation: Review the SVRS-GEOgraphic Precinct Mismatches using the attached Precinct Mismatch Excel Table (SVRS Data Extract 4/1/2022) and the G-SVRS Tool to validate Voter Points are in the correct precinct. Red dots on the G-SVRS Tool represent precinct mismatches between the SVRS and GIS files. [Click here](#) to view mismatched SVRS points for this area of interest.

According to E-911 Address and Tax Parcel *geographic* reference data, the SVRS Voter Points in this location are not in the correct Precinct 114 and State House District 34.

(4) SVRS Street Address Entry. Make sure addresses components (house number, street name, city name) are input in the correct data fields. The City Name should not be part of the Street Name (e.g., IAEGAER 87 LILLAC LANE, IAEGER, WV 24844). Incorrect and incomplete city-style addresses make it more difficult geocode to a map coordinate.
