All data is preliminary and subject to change following field checks and/or the acquisition of contradictory data

* DFE = Design Flood Elevation = BFE + Freeboard (2' for WV)

** Repaired homes represent all remodeled homes within the Building Inventory database - this makes the assumption that all structures within the floodplain built prior to 2017 were damaged during the 2016 flood

*** Owners include City of White Sulphur Springs, Town of White Sulphur Springs, Main Street White Sulphur Springs Incorporated, and City of White Sulphur Springs Building Commission; includes city parks and national forests

¹The total count of substantially damaged structures collected after the 2016 flood is 91, but two were damaged pre-flood
