RESOLUTION
MULTI-JURISDICTIONAL HAZARD MITIGATION PLAN UPDATE

A RESOLUTION OF THE COMMISSIONERS OF DODDRIDGE COUNTY, WEST VIRGINIA, TO ADOPT THE REGION VI PLANNING AND DEVELOPMENT COUNCIL'S MULTI-JURISDICTIONAL HAZARD MITIGATION PLAN UPDATE

WHEREAS, the Region VI Planning and Development Council (PDC) authorized the preparation of a Multi-Jurisdictional Hazard Mitigation Plan Update ("Hazard Plan Update") on behalf of its constituent counties and municipalities; and

WHEREAS, Skelly and Loy, Inc., was selected as the consultant to assist the PDC in the preparation of the Hazard Plan Update; and

WHEREAS, a Steering Committee held a public meeting to consider the draft Hazard Plan Update on September 7, 2017; and

WHEREAS, the Steering Committee and the PDC recommended that each county and municipality in the Region VI PDC area adopt the Hazard Plan Update; and

WHEREAS, the County Commissioners recognizes that the Hazard Plan Update is a non-binding, policy-oriented guidance document for the management of natural hazards and therefore desires to adopt the Hazard Plan Update as the official Hazard Plan Update for the County.

NOW, THEREFORE, BE IT RESOLVED by the County Commission as follows:

Section 1: The County Commissioners adopts the Hazard Plan Update entitled "Region VI Planning and Development Council Multi-Jurisdictional Hazard Mitigation Plan Update" hereinafter referred to as the "Hazard Plan Update", together with its appendices, prepared by Skelly and Loy, Inc. in the form and content presented at a duly advertised public meeting, as the County Hazard Plan Update for Doddridge County.

Section 2: The Hazard Plan Update as adopted by the Commissioners shall include the following chapters and all charts, tables, diagrams, appendices, figures and textual matter contained therein:

1. Introduction
2. Hazard Identification and Risk Assessment
3. Mitigation Strategy
4. Plan Maintenance Process

Section 3: The Hazard Plan Update shall include the regional hazard event profile maps entitled:

1. Doddridge County, WV
2. Harrison County, WV
3. Monongalia County, WV
4. Taylor County, WV
5. Preston County, WV
6. Marion County, WV

Section 4: This Resolution shall become effective and be in force immediately.

DULY ADOPTED this 1st day of May 2018, by the Commissioners of Doddridge County, West Virginia, in lawful session duly assembled.

Multi-Jurisdictional Hazard Mitigation Plan Update Adoption Resolution

MARION COUNTY, WEST VIRGINIA

A RESOLUTION OF THE COMMISSIONERS OF MARION COUNTY, WEST VIRGINIA, TO ADOPT THE REGION VI PLANNING AND DEVELOPMENT COUNCIL'S MULTI-JURISDICTIONAL HAZARD MITIGATION PLAN UPDATE

WHEREAS, the Region VI Planning and Development Council (PDC) authorized the preparation of a Multi-Jurisdictional Hazard Mitigation Plan Update ("Hazard Plan Update") on behalf of its constituent counties and municipalities; and

WHEREAS, Skelly and Loy, Inc., was selected as the consultant to assist the PDC in the preparation of the Hazard Plan Update; and

WHEREAS, a Steering Committee held a public meeting to consider the draft Hazard Plan Update on September 7, 2017; and

WHEREAS, the Steering Committee and the PDC recommended that each county and municipality in the Region VI PDC area adopt the Hazard Plan Update; and

WHEREAS, the County Commissioners recognizes that the Hazard Plan Update is a non-binding, policy-oriented guidance document for the management of natural hazards and therefore desires to adopt the Hazard Plan Update as the official Hazard Plan Update for the County.

NOW, THEREFORE, BE IT RESOLVED by the County Commissioners, as follows:

Section 1: The County Commissioners adopts the Hazard Plan Update entitled "Region VI Planning and Development Council Multi-Jurisdictional Hazard Mitigation Plan Update" hereinafter referred to as the "Hazard Plan Update", together with its appendices, prepared by Skelly and Loy, Inc., in the form and content presented at a duly advertised public meeting, as the County Hazard Plan Update for Marion County.

Section 2: The Hazard Plan Update as adopted by the Commissioners shall include the following chapters and all charts, tables, diagrams, appendices, figures and textual matter contained therein:

1. Introduction
2. Hazard Identification and Risk Assessment
3. Mitigation Strategy
4. Plan Maintenance Process

Section 3: The Hazard Plan Update shall include the regional hazard event profile maps entitled:

1. Doddridge County, WV
2. Harrison County, WV
3. Monongalia County, WV
4. Taylor County, WV
5. Preston County, WV
6. Marion County, WV

Section 4: This Resolution shall become effective and be in force immediately.

DULY ADOPTED this 27th day of June, 2018, by the Commissioners of Marion County, West Virginia, in lawful session duly assembled.

WHEREAS a Steering Committee held a public meeting to consider the draft Hazard Plan Update on September 7, 2017; and

WHEREAS, the Steering Committee and the PDC recommended that each county and municipality in the Region VI PDC area adopt the Hazard Plan Update; and

WHEREAS the Town Council ("Governing Body") of Blacksville recognizes that the Hazard Plan Update is a non-binding, policy-oriented guidance document for the management of natural hazards in the municipality and therefore desires to adopt the Hazard Plan Update prepared by the PDC as their municipal Hazard Plan Update.

NOW, THEREFORE, BE IT RESOLVED by the Governing Body of Blacksville, Monongalia County, West Virginia, as follows:

Section 1: The Governing Body adopts the Hazard Plan Update entitled "Region VI Planning and Development Council Multi-Jurisdictional Hazard Mitigation Plan Update" hereinafter referred to as the "Hazard Plan Update", together with its appendices, prepared by Skelly and Loy, Inc., in the form and content presented at a duly advertised public meeting, as the municipal Hazard Plan Update for Town of Blacksville.

Section 2: The Hazard Plan Update as adopted by the Governing Body shall include the following chapters and all charts, tables, diagrams, appendices, figures and textual matter contained therein:

I. Introduction
II. Hazard Identification and Risk Assessment
III. Mitigation Strategy
IV. Plan Maintenance Process

Section 3: The Hazard Plan Update shall include the regional hazard event profile maps entitled:

1. Doddridge County, WV
2. Monongalia County, WV
3. Monongalia County, WV
4. Taylor County, WV
5. Preston County, WV
6. Marion County, WV

Section 4: This Resolution shall become effective and be in force immediately.

DULY ADOPTED this 10 day of July, 2018, by the Governing Body of Town of Blacksville, Monongalia County, West Virginia, in lawful session duly assembled.

WHEREAS a Steering Committee held a public meeting to consider the draft Hazard Plan Update on September 7, 2017; and

WHEREAS, the Steering Committee and the PDC recommended that each county and municipality in the Region VI PDC area adopt the Hazard Plan Update; and

WHEREAS the Town Council ("Governing Body") of Rowlesburg recognizes that the Hazard Plan Update is a non-binding, policy-oriented guidance document for the management of natural hazards in the municipality and therefore desires to adopt the Hazard Plan Update prepared by the PDC as their municipal Hazard Plan Update.

NOW, THEREFORE, BE IT RESOLVED by the Governing Body of Rowlesburg, Preston County, West Virginia, as follows:

Section 1: The Governing Body adopts the Hazard Plan Update entitled "Region VI Planning and Development Council Multi-Jurisdictional Hazard Mitigation Plan Update" hereinafter referred to as the "Hazard Plan Update", together with its appendices, prepared by Skelly and Loy, Inc., in the form and content presented at a duly advertised public meeting, as the municipal Hazard Plan Update for Town of Rowlesburg.

Section 2: The Hazard Plan Update as adopted by the Governing Body shall include the following chapters and all charts, tables, diagrams, appendices, figures and textual matter contained therein:

I. Introduction
II. Hazard Identification and Risk Assessment
III. Mitigation Strategy
IV. Plan Maintenance Process

Section 3: The Hazard Plan Update shall include the regional hazard event profile maps entitled:

1. Doddridge County, WV
2. Harrison County, WV
3. Monongalia County, WV
4. Taylor County, WV
5. Preston County, WV
6. Marion County, WV

Section 4: This Resolution shall become effective and be in force immediately.

DULY ADOPTED this 11 day of June, 2018, by the Governing Body of Town of Rowlesburg, Preston County, West Virginia, in lawful session duly assembled.

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

MITIGATION PLANNING COMMITTEE MEETING #1
JUNE 7, 2017

AGENDA

I. INTRODUCTIONS

II. PROJECT OVERVIEW

A. PREVIOUS HAZARD MITIGATION PLANNING EFFORTS

B. HAZARD MITIGATION PLAN UPDATE PROCESS (Handout)

C. ROLE OF THE MITIGATION PLANNING COMMITTEE

III. HAZARD IDENTIFICATION AND RISK ASSESSMENT

A. HAZARD IDENTIFICATION

1. Updated Disaster History 2012 to Present (Handout)

B. HAZARD EVENT PROFILES

1. New Multi-Hazard Maps (Display Boards)
2. Updated NFIP Participation Status (Handout)
3. Updated NFIP Policy Claims/Repetitive Loss Data (TBD)
4. Updated HAZUS Analysis for Floods, Earthquakes, Wind

IV. REGIONALIZATION OF HAZARD MITIGATION GOALS/MITIGATION STRATEGY

V. DISTRIBUTION OF MUNICIPAL ACTION PLANS (Due July 15th)

VI. NEXT MEETING (Public Meeting)

FEMA

Fact Sheet

Federal Insurance and Mitigation Administration

LOCAL HAZARD MITIGATION PLANNING

Hazard Mitigation Planning for Resilient Communities

Disasters can cause loss of life; damage buildings and infrastructure; and have devastating consequences for a community's economic, social, and environmental well-being. Hazard mitigation is the effort to reduce loss of life and property by lessening the impact of disasters. In other words, hazard mitigation keeps natural hazards from becoming natural disasters.

Hazard mitigation is best accomplished when based on a comprehensive, long-term plan developed before a disaster strikes. Mitigation planning is the process used by state, tribal, and local leaders to understand risks from natural hazards and develop long-term strategies that will reduce the impacts of future events on people, property, and the environment.

The Local Mitigation Planning Process

The mitigation plan is a community-driven, living document. The planning process itself is as important as the resulting plan because it encourages communities to integrate mitigation with day-to-day decision making regarding land use planning, floodplain management, site design, and other functions. Mitigation planning includes the following elements:

Public Involvement – Planning creates a way to solicit and consider input from diverse interests, and promotes discussion about creating a safer, more disaster-resilient community. Involving stakeholders is essential to building community-wide support for the plan. In addition to emergency managers, the planning process involves other government agencies, businesses, civic groups, environmental groups, and schools.

Risk Assessment – Mitigation plans identify the natural hazards and risks that can impact a community based on historical experience, estimate the potential frequency and magnitude of disasters, and assess potential losses to life and property. The risk assessment process provides a factual basis for the activities proposed in the mitigation strategy.

Mitigation Strategy – Based on public input, identified risks, and available capabilities, communities develop mitigation goals and objectives as part of a strategy for mitigating hazard-related losses. The strategy is a community's approach for implementing mitigation activities that are cost-effective, technically feasible, and environmentally sound as well as allowing strategic investment of limited resources.

Disaster Mitigation Act of 2000

The Robert T. Stafford Disaster Relief and Emergency Assistance Act, as amended by the Disaster Mitigation Act of 2000, is intended to "reduce the loss of life and property, human suffering, economic disruption, and disaster assistance costs resulting from natural disasters."

Under this legislation, state, tribal, and local governments must develop a hazard mitigation plan as a condition for receiving certain types of non-emergency disaster assistance through the Hazard Mitigation Assistance Programs. The regulatory requirements for local hazard mitigation plans can be found at Title 44 Code of Federal Regulations §201.6.

For more information about FEMA's Hazard Mitigation Assistance Grants, visit: www.fema.gov/hazard-mitigation-assistance.

"FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards."

Benefits of Hazard Mitigation

Mitigation is an investment in your community's future safety and sustainability. Mitigation planning helps you take action now, before a disaster, to reduce impacts when a disaster occurs. Hazard mitigation planning helps you think through how you choose to plan, design, and build your community and builds partnerships for risk reduction throughout the community. Consider the critical importance of mitigation to:

- Protect public safety and prevent loss of life and injury.
- Reduce harm to existing and future development.
- Maintain community continuity and strengthen the social connections that are essential for recovery.
- Prevent damage to your community's unique economic, cultural, and environmental assets.
- Minimize operational downtime and accelerate recovery of government and business after disasters.
- Reduce the costs of disaster response and recovery and the exposure to risk for first responders.
- Help accomplish other community objectives, such as capital improvements, infrastructure protection, open space preservation, and economic resiliency.

Having a hazard mitigation plan will increase awareness of hazards, risk, and vulnerabilities; identify actions for risk reduction; focus resources on the greatest risks; communicate priorities to state and federal officials; and increase overall awareness of hazards and risks.

Mitigation Activities for Risk Reduction

Possible mitigation activities may include:

Adoption and enforcement of regulatory tools, including ordinances, regulations, and building codes, to guide and inform land use, development, and redevelopment decisions in areas affected by hazards.

Acquisition or elevation of flood-damaged homes or businesses retrofit public buildings, schools, and critical facilities to withstand extreme wind events or ground shaking from earthquakes.

Creating a buffer area by protecting natural resources, such as floodplains, wetlands, or sensitive habitats. Additional benefits to the community may include improved water quality and recreational opportunities.

Implement outreach programs to educate property owners and the public about risk and about mitigation measures to protect homes and businesses.

Mitigation Plan Implementation & Monitoring

History shows that hazard mitigation planning and the implementation of risk reduction activities can significantly reduce the physical, financial, and emotional losses caused by disasters. Putting the plan into action will be an ongoing process that may include initiating and completing mitigation projects and integrating mitigation strategies into other community plans and programs. Monitoring the plan's implementation helps to ensure it remains relevant as community priorities and development patterns change.

Planning Guidance, Tools, and Resources

FEMA provides a variety of guidance, tools, and resources to help communities develop hazard mitigation plans. These resources and more can be found online at: www.fema.gov/hazard-mitigation-planning-resources.

- Hazard mitigation planning laws, regulations, and policies guide development of state, local, and tribal FEMA-approved hazard mitigation plans.
- The Local Mitigation Planning Handbook is the official guide for governments to develop, update, and implement local plans. The Handbook includes guidance, tools, and examples communities can use to develop their plans.
- Mitigation Ideas: A Resource for Reducing Risk to Natural Hazards provides ideas for mitigation actions.
- Visit www.fema.gov/hazard-mitigation-planning-training for more information on available online and in-person mitigation planning training.

"FEMA's mission is to support our citizens and first responders to ensure that as a nation we work together to build, sustain, and improve our capability to prepare for, protect against, respond to, recover from, and mitigate all hazards."

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

MITIGATION PLANNING COMMITTEE MEETING #1 MINUTES
JUNE 7, 2017

Attendees:
See Attached Sign-In Sheet

Handouts:
Agenda
FEMA Local Hazard Mitigation Planning Fact Sheet
Region VI PDC Updated Disaster History (2012 to Present)
Region VI PDC Updated NFIP Participation Status

Meeting Summary:
Sheena Hunt called the meeting to order at 5:30 P.M. and thanked everyone in attendance for participating in the Region VI Hazard Mitigation Plan Update process. Ms. Hunt indicated that Region VI had applied for, and was awarded, a Hazard Mitigation Planning Grant through the WV Division of Homeland Security and Emergency Management to prepare the mandatory, 5-year update of its hazard mitigation plan. To that end, Region VI solicited proposals from qualified hazard mitigation planning firms and selected Skelly and Loy to serve as the planning consultant for this project.

Following Ms. Hunt's opening remarks, Kevin Starner of Skelly and Loy initiated a round-robin introduction of all participants attending the meeting. In total, 44 people were in attendance at the meeting, representing a diverse array of regional municipalities, counties, commissions, authorities, emergency services providers, healthcare providers, businesses, and educational institutions.

Mr. Starner provided an overview of the hazard mitigation planning process, as defined by the Disaster Mitigation Act of 2000. In short, the hazard mitigation planning process is a two-step process whereby a county or local jurisdiction identifies and assesses its known hazard vulnerabilities and then makes recommendations for alleviating or mitigating those vulnerabilities. The purposes of the mandatory, 5-year update are to identify any new or expanded hazard vulnerabilities, to identify what measures have been completed in the interviewing 5-year period, and to develop any new mitigation recommendations and associated priorities for the planning area.

Mr. Starner explained that the role of the Mitigation Planning Committee is to serve as the "working group" for the development of the Hazard Mitigation Plan Update. The Mitigation Planning Committee will oversee the development of the Hazard Mitigation Plan Update and provide recommendations for improvements and/or revisions. The members of the Mitigation Planning Committee are also tasked with informing the local elected officials that the regional hazard plan is in the process of being updated and will eventually be distributed in draft format for local review, prior to plan adoption. Adoption by the local jurisdictions enables continued eligibility for post-disaster hazard mitigation grant funds, including federal grant monies available

through FEMA's Hazard Mitigation Grant Program (HMGP) and Flood Mitigation Assistance Program (FMAP).

In regard to the updated Hazard Identification and Risk Assessment (HIRA), Mr. Starner provided a handout showing the updated disaster history from 2012 to present for the Region VI PDC planning area. The analysis of declared disaster events during the intervening 5-year period is a logical first step to updating the HIRA portion of the plan. Mr. Starner also discussed the concept of including new multi-hazard maps at the county level in this Plan Update. All members of the Mitigation Planning Committee agreed that the inclusion of the multi-hazard maps would be an enhancement to the overall plan.

Analyses of National Flood Insurance Program (NFIP) participating status, claims payments, and repetitive loss properties are also to be included as part of the Hazard Mitigation Plan Update. Mr. Starner indicated that NFIP participating status and claims payments are readily available via FEMA's website and have already been analyzed for the Plan Update, but Repetitive Loss data must be requested from the WV Division of Homeland Security and Emergency Management. Two email requests have already been submitted to the appropriate individual at the Division of Homeland Security, but no response has been received to date. Mr. Starner suggested that Ms. Hunt may have to request this data directly from the state as it is not often provided to a private contractor. This will continue to be investigated.

Mr. Starner noted that Skelly and Loy's subcontractor for this project, Dewberry, will be providing updated HAZUS analyses for earthquakes and wind/hurricane damage. According to the state grant application, the Division of Homeland Security is tasked with providing the updated flood risk assessment. JD Whitesel of the Division of Homeland Security indicated that the updated flood risk assessment was in the process, but likely wouldn't be finished by the time the Region VI Plan Update is scheduled for completion. Mr. Starner will inquire Dewberry to see if they would be willing to run the HAZUS flood risk assessment as part of their scoped HAZUS analysis.

Discussion ensued regarding the possibility of reducing the overall size of the plan to something less than its current 592-pages. Mr. Starner suggested that the concept of regionalizing the document (which has been approved by the Division of Homeland Security as an acceptable means for updating the plan) could go a long way in reducing its overall bulk. To date, the Chapter 3 Goals information has been reduced from 155 pages down to 6 by adopting a more regionalized approach. No goals were lost in this process, but significant repetitive information was purged. The same could also be done to the Hazard Mitigation Action Plans, which could be moved to the appendices. All members of the Mitigation Planning Committee agreed with the concept of reducing the overall bulk of the document by way of a more regionalized approach. This will avoid significant repetition throughout the document, while still meeting FEMA's base requirements for having identifiable action items for each participating jurisdiction.

Mr. Starner indicated that updating the municipal Hazard Mitigation Action Plans is a significant component of the Plan Update process. Those city, town, and county representatives in attendance at the meeting were requested to see Mr. Starner at the conclusion of the meeting to pick up their local Action Plan for review. The remaining action plans will be emailed to the various cities, towns, and counties by Ms. Hunt following the meeting. The updated action plans are to be returned to Mr. Starner no later than July 15th. If no response is received from any one particular jurisdiction, the Mitigation Planning Committee will assume that no changes or revisions were requested by that particular jurisdiction.

The next meeting in the planning process will be a public meeting, which is likely to be scheduled for the end of August/beginning of September. This timeframe will correspond with when the draft Plan Update is anticipated to be ready for public review. The next Mitigation Planning Committee Meeting will be held shortly thereafter.

Any questions on the Hazard Mitigation Plan or the plan update process should be directed to Sheena Hunt at Region VI PDC or Kevin Starner at Skelly and Loy. All participants were thanked for attending the meeting, and the meeting was adjourned at approximately 6:30 P.M.

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

MITIGATION PLANNING COMMITTEE MEETING #2
NOVEMBER 1, 2017

AGENDA

I. INTRODUCTIONS

II. REVIEW OF PLANNING PROCESS

- **A. FIRST MITIGATION PLANNING COMMITTEE MEETING – JUNE 7TH**
- **B. REVIEW/UPDATE OF MUNICIPAL ACTION PLANS (June through August)**
- **C. MANDATORY PUBLIC MEETING – SEPTEMBER 7TH (Pleasant Valley)**
- **D. DRAFT PLAN POSTED ON REGION VI WEBSITE – SEPTEMBER 22ND**
- **E. COMMENT DEADLINE – OCTOBER 13TH**

III. PLAN CONSOLIDATION EFFORTS (592 pages down to 348 pages)

IV. COMMENTS RECEIVED TO DATE

V. OPEN DISCUSSION

VI. NEXT STEPS

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

MITIGATION PLANNING COMMITTEE MEETING #2 MINUTES
NOVEMBER 1, 2017

Attendees:
See Attached Sign-In Sheet

Handouts:
None

Meeting Summary:
Sheena Hunt called the meeting to order at 6:00 P.M. and thanked everyone in attendance for participating in the second Mitigation Planning Committee meeting for the Region VI Hazard Mitigation Plan Update.

Following Ms. Hunt's opening remarks, Kevin Starner of Skelly and Loy provided a brief summary of the planning process completed to date. The first Mitigation Planning Committee meeting was held on the evening of June 7th to introduce the planning process and initiate the hazard mitigation action plan update with each of the 45 member governments. The months of July and August were used to complete the hazard mitigation action plan updates, and a public meeting was held on the evening of September 7th at the Pleasant Valley Municipal Building. Shortly thereafter, the draft Hazard Mitigation Action Plan was posted on the PDC's website on September 22nd with an October 13th comment deadline.

Mr. Starner provided a summary of the organizational and logistical efforts that were used to consolidate the updated Hazard Mitigation Plan from 592 pages down to approximately 348 pages. These plan consolidation efforts included the following:

- The narrative discussion of past plan development was deleted from Chapter 1 and relocated to the Technical Appendices.
- The hazard mitigation planning goals were presented as a regional initiative, as opposed to individual goals for each jurisdiction. This concept was unanimously agreed upon at the first Mitigation Planning Committee meeting and supported by the WV Division of Homeland Security and Emergency Management.
- The regional asset inventory was deleted from Chapter 2 and relocated to the Technical Appendices.
- The individual hazard mitigation action plans were deleted from Chapter 3 and relocated to the Technical Appendices.

Mr. Starner indicated that four people provided comments on the draft Hazard Mitigation Plan as follows:

- George Eidel from the Doddridge County Department of Emergency Services requested information about the 1950 flood be incorporated into the risk assessment.
- Richard Wood from the Monongalia County Planning Commission issued several corrective comments on the Asset Inventory, as well as one editorial comment on Chapter 2.

- Guy Ward from the Town of White Hall inquired about the applicability of certain hazard mitigation measures assigned to the Town. Further coordination is needed with Mr. Ward to resolve this comment.
- Kurt Donaldson from the WVU GIS Technical Center issued several comments on the Hazard Identification and Risk Assessment, as well as certain mitigation planning goals and mitigation measures. Further review will be required to address these comments.

Mr. Wood inquired about the pending adoption schedule and if we were still planning to provide sample adoption resolutions. Mr. Starner indicated that the draft plan will be submitted to the WV Division of Homeland Security and Emergency Management and FEMA for review and approval prior to local adoption. It is unknown how long the state and federal review will take, nor do we know what level of comments these entities will issue on the draft plan. Once conditionally approved by FEMA, sample adoption resolutions will be provided for local use.

Discussion ensued regarding the PDC's capability to adopt the updated Hazard Mitigation Plan. If the PDC can adopt the plan (per its operating bylaws), it would be convenient to do so as the first adoption entity, thereby enabling formal approval by FEMA. If the PDC cannot adopt the plan, one municipality will need to be selected to adopt the plan such that FEMA can issue its formal approval. Adoption by the other 44 member governments would follow thereafter.

Kurt Donaldson inquired if the identified hazard mitigation measures were going to be prioritized for implementation. Mr. Starner noted that prioritization of the hazard mitigation measures was completed at the local level for each county and municipality and will be included as part of the updated Hazard Mitigation Action Plans in the Technical Appendices.

Any questions on the Hazard Mitigation Plan or the plan update process should be directed to Sheena Hunt at Region VI PDC or Kevin Starner at Skelly and Loy. All participants were thanked for attending the meeting, and the meeting was adjourned at approximately 7:00 P.M.

REGION VI PLANNING & DEVELOPMENT COUNCIL
HAZARD VULNERABILITY ASSESSMENT AND MITIGATION PLAN UPDATE - 2017

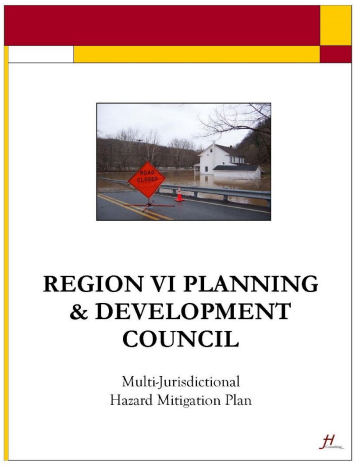

Public Meeting – Thursday, September 7, 2017

What is hazard mitigation planning?

Hazard mitigation is the effort to reduce loss of life and property by lessening the impact of disasters.

The Disaster Mitigation Act of 2000 requires state, tribal and local governments to develop a hazard mitigation plan as a condition for receiving certain types of non-emergency disaster assistance through FEMA's Hazard Mitigation Assistance Programs.

Previous Planning Efforts

Hazard Mitigation Plan Update Process

1. Hazard Identification and Risk Assessment
2. Update Mitigation Strategy
3. Public Involvement

Mitigation Steering Committee

Monongalia Co. Board of Education

Taylor Co. Sheriff Dept.

Alternative Testing Labs, Inc.

Town of Flemington

City of Pleasant Valley

City of Morgantown

Harrison Co. Dept. of Emergency Services and Public Safety

Preston Memorial Hospital

United Hospital Center

City of Salem

WV Division of Homeland Security

WVU GIS Technical Center

Taylor Co. Commission

Doddridge Co. Office of Emergency Mgmt.

City of Bridgeport

Fairmont-Marion Co. Transit Authority

Marion Co. Dept. of Homeland Security and Emergency Mgmt.

Marion Co. Health Dept.

Marion Co. Board of Education

Harrison Co. Planning Dept.

Hazard Identification and Risk Assessment

- Inclusion of disaster history for each county
- Inclusion of NFIP Participation Status & Policy Info.
- Updated Repetitive Loss Data (including density mapping
- Inclusion of Multi-Jurisdictional Hazard Maps
- Updated HAZUS Analysis for Wind, Earthquakes, and Flooding

Mitigation Strategy

Based on public input, identified risks, and available capabilities, communities develop mitigation goals and objectives as part of a strategy for mitigating hazard-related losses.

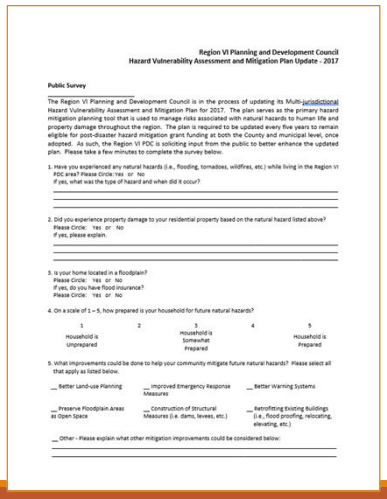

Mitigation Strategy

1. Preventive Measures
2. Emergency Services
3. Property Protection
4. Structural Projects
5. Natural Resources Protection
6. Public Information

Region VI Planning and Development Council
Hazard Vulnerability Assessment and Mitigation Plan Update - 2017

Public Survey

The Region VI Planning and Development Council is in the process of updating its Multi-jurisdictional Hazard Vulnerability Assessment and Mitigation Plan for 2017. The plan serves as the primary hazard mitigation planning tool that is used to manage risks associated with natural hazards to human life and property damage throughout the region. The plan is required to be updated every five years to remain eligible for post-disaster hazard mitigation grant funding at both the County and municipal level, once adopted. As such, the Region VI PDC is soliciting input from the public to better enhance the updated plan. Please take a few minutes to complete the survey below.

1. Have you experienced any natural hazards (i.e., flooding, tornadoes, wildfires, etc.) while living in the Region VI PDC area? Please Circle: Yes or No
If yes, what was the type of hazard and when did it occur?

2. Did you experience property damage to your residential property based on the natural hazard listed above?
Please Circle: Yes or No
If yes, please explain.

3. Is your home located in a floodplain?
Please Circle: Yes or No
If yes, do you have flood insurance?
Please Circle: Yes or No

4. On a scale of 1 – 5, how prepared is your household for future natural hazards?

1	2	3	4	5
Household is Unprepared		Household is Somewhat Prepared		Household is Prepared

5. What improvements could be done to help your community mitigate future natural hazards? Please select all that apply as listed below.

__ Better Land-use Planning
__ Improved Emergency Response Measures
__ Better Warning Systems
__ Preserve Floodplain Areas as Open Space
__ Construction of Structural Measures (i.e. dams, levees, etc.)
__ Retrofitting Existing Buildings (i.e., flood proofing, relocating, elevating, etc.)
__ Other - Please explain what other mitigation improvements could be considered below:

I. CALL TO ORDER

Kim Haws, Chairperson called meeting to order at approximately 5:30 p.m.

II. APPROVAL OF MINUTES OF

Kim Haws, Chairperson asked if there were any corrections or additions to the June 15, 2016 meeting minutes. With no corrections or additions indicated, motion was made by Barbara Metcalfe to accept the minutes as presented. Motion was seconded by Orie Ellen Sterling. Motion passed unanimously.

III. FINANCIAL STATEMENTS:

Financial statements were presented for the months of May, June, July and August 2016. Kim Haws, Chairperson, asked if there were any questions on the financials. Motion was made by James Wagner to approve financial statements as presented and was seconded by Roger Tichenell. Motion passed unanimously.

IV. CHAIRPERSON REPORT/INTERIM DIRECTOR'S REPORT

Please see attached.

Executive Director's Report
Region VI PDC Full Council Meeting
September 21, 2016

Region VI continues to work on bringing projects to the final stage necessary to bid and loan closing:

River Road PSD: loan closed in August; received payment for all administration to that point; contractor has begun the project. It is anticipated that this project will wrap around the first of the year
Deckers Creek PSD: still working on getting to loan closing
Preston County PSD #2: finalizing requirements for rights-of-way in order to request authorization to bid and ultimately loan closing
Rowlesburg Water Project: finalizing requirements for rights-of-way in order to request authorization to bid and ultimately loan closing
Colfax PSD sewer project: working on providing information to WVDO in order to release funds for engineering and project administration

I met with Minister's Run Water Association to help determine if they are able to do a water system upgrade and extension project. Due to some internal issues that need resolved, Region VI will touch base with them within the next month or so.

The Comprehensive Economic Development Strategy (CEDS) five-year plan requires updating. We reached out to WVU and Fairmont State University to see if an intern would be interested in working on the update. Two candidates from Fairmont State submitted resumes and were interviewed and I will be making a decision and contacting the student selected early next week. This person was offered compensation at $13.00 an hour, for no more than 20 hours per week, with Region VI paying the required taxes on the wages earned and this would equate to approximately $8,000.00. The intern will review the existing CEDS and work with staff to update the information as applicable and prepare a draft of the CEDS to present to the CEDS Strategy Committee for review and modifications. According to revised CEDS guideline, this committee is necessary and should represent the main economic interests of the region. Any volunteers? Staff has identified some board members for this committee and has initiated contact.

In June 14, 2016 the state budget was up in the air regarding funding for the state's regional councils that funding could be eliminated, greatly reduced through the legislature or fall to the WVDO for discretionary funding of the regional councils. It has been approved that the state's regional councils will receive $31,363.00 each. As an order of business the Full Council will need to adopt the resolution and sign the agreement with the state to use the funds as indicated by the state as matching funds to obtain federal dollars for economic development initiatives.

The five-year Multi-Jurisdictional Hazard Mitigation Plan expires April 2017. At this time, it is a requirement of WV DHS and FEMA to update the plan. A legal advertisement for a consultant was sent to various newspapers and three firms provided statements of qualifications and one firm was selected to assist with the application preparation and submission as well as the plan update. I still need to discuss a price for these services. A brief presentation follows by Skelly & Loy.

Staff will be participating in site visits with the US Economic Development Administration on September 22, 2016. We will be visiting two projects that received EDA funding in 2010. The purpose of these visits is to fulfill the EDA's statutory requirement to validate investment and aggregate project outcome data. The two projects are: Enlarged Hepzibah PSD sewer line extension and the Town of Worthington's wastewater treatment plant upgrade.

The U.S. EPA is requesting letters of interest for a new round of Building Blocks for Sustainable Communities technical assistance. The EPA will select 25 communities to receive targeted assistance to help overcome barriers to smarter, more environmentally and economically sustainable growth. This assistance will help communities, local governments, and tribal governments improve their capacity to implement smart growth and other approaches that protect the environment, improve public health, and expand economic opportunity.

- **Eligibility:** The applicant can be a local, county, or tribal government, or a nonprofit organization that has the support of the local government on whose behalf they are applying.
- **Deadline:** 5:00 p.m. Eastern time on October 12, 2016.
- **How to apply:** Submit a two-page letter of interest signed by a mayor, city manager, elected official, or other representative of the community (see the Request for Letters of Interest for details).
- **Timeframe:** EPA expects to select 25 recipients by November 2016 and provide all technical assistance by July 2017.

The deadline for letters of interest is October 12 and information on how to apply can be found on the EPA website. Communities will be notified of their acceptance in November.

From correspondence with the WVDO, it is anticipated that this year's Small Cities Block Grant awards may be announced in December.

Is there any interest in LED street lighting? Major obstacle is there no existing tariff to regulate such lighting in order to save money. The RPDC Association is inquiring as to whether communities are interested in having lights converted to LED and would be supportive of approaching the state legislature and PSC to discuss establishing appropriate rates. If interested, please let me know so that I can pass the information along to the RPDC

V. NEW BUSINESS:

- Approval of Resolution & Contract with the WV Development Office Regional Planning funds in the amount of $31,363. These funds are used to match federal grants (Appalachian Regional Commission). Motion was made by ML Quinn and seconded by Tim Oxley. Motion passed unanimously.

VI. UNFINISHED BUSINESS:

- Update Barry Pallay: Reopening Locks on Upper Mon & Re-Growing Commerce, Recreation & Economic Development.

- The Monongahela River Trails Conservancy (Marion, Monongalia and Preston) was awarded $21,440.00 from Transportation Alternatives & Recreational Trails Grant Program to update rail trail maps.

VII. GENERAL COMMENTS:

VII. ADJOURMENT:

Motion was made by Barbara Metcalfe to adjourn meeting and seconded. Motion passed unanimously.

Kim Haws, Chairperson

December 14, 2016

Date of Approval

FULL COUNCIL MEETING
WEDNESDAY, SEPTEMBER 21, 2016
5:30 P.M

September 6, 2016

County Commission/Municipality
West Virginia

Dear Commission President/Mayor:

The West Virginia Department of Homeland Security (DHS) along with FEMA has requested all regional PDCs that were affected by the most recent disasters to amend their current plans to include **Mitigation Reconstruction** in their Hazard Mitigation strategies. Since all hazard mitigation is available throughout the state, they would like to request that Region VI PDC do the same.

Please see the enclosed attachments. The first is example language of the proposed strategy amendment. The second is a sample letter that Region VI PDC counties and municipalities need to sign and send back to our office. These attachments have been constructed as template language so each will need to be modified for respective counties.

In order to follow the requirement of WV DHS/FEMA, the following steps are to be undertaken:

- Region VI PDC will provide a copy of the amendment language and sample letter to each County to ask if the amendment strategy is acceptable
- If acceptable, the County will send back the signed amendment request letter to the PDC
- Region VI PDC will send up an official request packet to the State that will include:
  - Official letter from the PDC requesting approval of the amendment strategy
  - Signed County Letters
  - Copy of the updated strategy language incorporated into the Hazard Mitigation Plan
  - State will forward the PDC packet/request to FEMA for approval
  - FEMA will review and approve

Region VI is also taking steps to initiate an update to the Multi-Jurisdictional Hazard Mitigation Plan, which expires at the end of April 2017. As part of the proposed update, this same language will need to be incorporated into the update so each county will be following this process again within the coming months.

If you have any questions about this process please feel free to me at 304-366-5693, extension 114 or by e-mail at sheenahunt@regionvi.com.

Sincerely,

Sheena Hunt
Executive Director

Springfield, WV 12345

RE: Hazard Mitigation Plan Amendment

Dear Mr/s.:

In light of the recent flood disaster, XXXX County would like to request an amendment to our current Hazard Mitigation Plan strategies to include additional structural projects; specifically Mitigation Reconstruction. The allowance of these additional options, made available to our residents during catastrophic events, is a top priority of XXXX County. Should there be any questions, please do not hesitate to contact us. Please see the below mitigation strategy language which XXXX County would like to include as an amendment to the Region # Planning and Development Council Hazard Mitigation Plan.

Project XXXX: XXXX County will continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within XXXX County. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. XXXX County will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.

Sincerely,

Name

President, XXXX County Commission

Project XXXX: XXXX County will continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within XXXX County. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. XXXX County will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.

APPENDIX D -
REGION VI PAST HAZARD PLAN DEVELOPMENT
(BY COUNTY)

REGION VI PAST HAZARD PLAN DEVELOPMENT (BY COUNTY)

This appendix presents the planning processes used by the individual counties to both develop and update their Hazard Mitigation Plans between 2003 and 2010.

DODDRIDGE COUNTY

At the direction of the Doddridge County Office of Emergency Services (OES), Doddridge County and the Town of West Union have developed and conducted the first update to their Multi-Jurisdictional Hazard Mitigation Plan in an effort to indicate probable hazard risks, profile future hazard events, estimate damage and losses as a result of future hazard events, and advocate mitigative projects to reduce the effects of the identified hazards on the communities within the county. The plan's aim is to create safer, more disaster-resistant communities.

The Doddridge County Commission compiled a Hazard Mitigation Planning Committee (HMC), known as project stakeholders, to be responsible for the development, implementation, and updating of the plan. The committee included representatives from Doddridge County Office of Emergency Services, Doddridge County Economic Development Authority, West Union Town Council, Doddridge County Board of Education, Doddridge County Planning Commission, Doddridge County Emergency Medical Services, West Virginia Division of Natural Resources, Doddridge County Commission, West Virginia Division of Highways, and R. D. Zande & Associates, Inc.

The actions of the project stakeholders were continually documented in the local media, such as the local newspaper. As such, participating jurisdictions and the public were updated as to the status of the plan's preparation and the repercussions of not completing a plan. Further, with respect to the development of an action plan, two stakeholders meetings and two general public meetings were scheduled. The meetings addressed the development of the plan as well as ways in which agencies within the county could work together to implement the identified mitigation strategies.

Feedback received from the HMC and the public proved valuable in the development and updating of the plan. Several comments were received that resulted in the reevaluation of the proposed high-priority mitigative actions as well as the risks that should be included in the plan. The public in attendance at the meetings showed a strong desire to be educated as to what it could do to assist mitigation. (One of the meetings was scheduled immediately

preceding a county development authority meeting so as to increase attendance.) As a result, the plan has been tailored to Doddridge County's specific needs and will prove to be a document that county residents can feel ownership of and utilize to make educated decisions that will reduce their vulnerability to hazards.

Methodology

The risk assessment phase of the mitigation plan was completed using a variety of research techniques. Federal Emergency Management Agency (FEMA) Geo-Hazards and other Internet sites were searched for historical hazard event records. R. D. Zande & Associates, Inc. conducted searches of local newspaper and media archives as well as existing reports and plans, which were on file with the governing bodies, to assist in the determination of hazard susceptibility areas. Interviews and other discussions were conducted with numerous local officials (including first responders, insurance agents, and West Virginia Division of Highways officials) to ascertain the risks associated with particular hazards in specific areas of the county. After identifying the areas in which the hazards were most prominent, they were profiled and positioned into a base map of the county. This Geographic Information System (GIS)-based map contains several layers with information regarding the individual hazards. Within each of the denoted "hazard risk areas," assets (structures, utilities, etc.) were inventoried and loss estimates were calculated for each of the inventoried assets with respect to that particular hazard. The general public of Doddridge County was further involved in the process as information was gathered from the county's assets to complete loss estimates. The county's contractor contacted representatives from each of these assets, explaining the process and collecting ideas.

Following completion of the risk assessment, the HMC used information such as hazard profiles and loss estimates to formulate mitigation goals, objectives, and strategies. For this phase of the project, the HMC met separately to discuss baseline strategies. Such an action was reasoned to be most appropriate, as project stakeholders are individuals who deal with hazard events on a regular basis and will be directly affected by the plan. Members of the HMC were notified via memoranda and telephone correspondence from the county commission. The stakeholders' ideas were used as a starting point for further planning steps.

The baseline mitigation strategies were presented to the public at the general public meetings to ensure fair participation from all sectors of the county. These meetings were not well attended, but those in attendance provided valuable insight that was used in the

development of the plan. These meetings were publicized at public county commission meetings as well as on the front page of the local newspaper.

In an effort to obtain greater public comment, the commission's contractor distributed Households Hazard Preparedness Questionnaires to members of the general public. These questionnaires allowed members of the general public to participate in the process without requiring a presentation in front of a crowd. They were also a convenient form of participation in terms of work schedules, etc. The Doddridge County Commission received many completed questionnaires for inclusion into the planning document.

Formal Adoption of the Plan

The Doddridge County Commission and the Town of West Union worked cooperatively to complete and update this Hazard Mitigation Plan. To show each entity's dedication to completing and updating this project, a letter of agreement was signed by both entities preceding the start of the planning process. Following completion of the original plan and updated plan, both entities adopted formal resolutions to implement the plan in their jurisdictions.

Copies of the adopting documents are included in the plan. Also, a letter was sent to appropriate organizations and civic groups throughout Doddridge County, notifying them of the adoption of the plan and plan's relevance to them. A copy of the form letters used is also included.

HARRISON COUNTY

Original Plan Development

Harrison County Bureau of Emergency Services, Bridgeport Office of Emergency Services, and Harrison County Planning Commission developed the Harrison County Hazard Mitigation Plan in a cooperative manner. The first step was identification of the different community partners – individuals representing various functions who should be involved in the planning process. Further, a plan was developed to ensure public participation.

Below is a summary of functions found to be necessary components of the planning process.

1. Infrastructure
2. Healthcare

3. Government
4. Education
5. Volunteer and Community-Based Organizations
6. Business and industry
7. General Public

The above functions were addressed by representatives from the following:

- Veterans Administration Medical Center
- Jan-Care Ambulance Service
- Harrison County Emergency Medical Service
- City of Shinnston
- Town of West Milford
- Town of Lost Creek
- Enlarged Hepzibah Public Service District
- Greater Harrison County Public Service District
- Harrison/Clarksburg Health Department
- City of Clarksburg
- Clarksburg Water Board
- Dominion Hope
- Verizon
- Harrison County Solid Waste Authority
- WBOY-TV
- United States Department of Agriculture (USDA)
- Town of Lumberport
- City of Salem
- Harrison County Appraisers
- Harrison County Surveyors
- American Red Cross
- Town of Anmoore
- Harrison County Planning Commission
- Town of Nutter Fort
- City of Stonewood
- Harrison County Bureau of Emergency Services
- Bridgeport Office of Emergency Services
- Harrison/Marion Regional Airport
- West Virginia Division of Highways (WVDOH)
- Harrison County Senior Citizens Center
- Harrison County Volunteer Fire Departments
- Citizens of Harrison County

Members from these agencies formed focus groups. These groups met four times during a three-month period. These groups reviewed the following plans and documents in an

effort to ascertain which elements could be integrated into the Harrison County Hazard Mitigation Plan:

- Harrison County, Bridgeport, and Clarksburg comprehensive plans
- Health department and hospital emergency plans
- Harrison County Bureau of Emergency Services plans
- Harrison County, Bridgeport, and Clarksburg subdivision regulations
- Permitting ordinances, including floodplain for all municipalities and Harrison County
- Data maintained by the Bureau of Emergency Services, planning commission, weather service, utilities, Soil Conservation Service, and other critical facilities

During these focus group meetings, the groups addressed the following questions:

- What area within your jurisdiction are potential disasters?
- What are your current policies, issues, and challenges?
- What needs changing in your organization/jurisdiction based upon the past and possibly what might happen in the future?
- What types of indicators are necessary to track the success of goals?
- What strategies will be used to attain goals that are short-term, medium-term, long term, and ongoing?
- Are the strategies cost effective?
- Are the strategies easy to keep within budget?
- Who are the responsible parties?
- What would happen if no actions were taken?
- How will we monitor our progress?
- What schedule and procedures will be used for plan review – including public hearings?

The information derived from the meetings that were held formed the basis for the goals and objectives, actions, and evaluation systems contained in this plan.

As required by the Citizen Participation Plan and the Disaster Mitigation Act of 2000, a public hearing was conducted to obtain citizen views and comments for inclusion in the plan. Notice of public hearing was placed in the newspaper on March 22, 2003, and the first meeting was held on April 18, 2003. No one from the public attended.

First Update

This project serves as the first formal update of the plan for Harrison County and the municipalities therein. As the primary coordinator of the original Harrison County plan, the Harrison County Planning Commission was extensively involved in this project. The planning commission provided direct input into the determinations of updated project status as well as floodplain management throughout the county. The planning commission was also encouraged to extensively review this draft document upon its completion. It is also significant to note that, as part of its original plan development, Harrison County created a "citizen participation plan."

MARION COUNTY

Original Plan Development

The original plan was prepared by utilizing a Homeland Security Vista volunteer. The worker was hired to prepare the plan as a living document as Marion County did not have the personnel or funds to compile the manual alone.

The process of creating the original document involved much research on historical disaster data by searching various sources in the community, federal agencies, state agencies, local business owners, insurance companies, and local government agencies. Other resources (such as county maps, library books, newspaper articles, various Internet websites, etc.) were also utilized.

With respect to the development of an action plan, two special stakeholders portions of Local Emergency Planning Committee (LEPC) meetings and two general public meetings were scheduled to discuss the risks to which the county was susceptible as well as projects that could better prepare the county to cope with those risks.

Feedback received from the stakeholders and the public proved valuable in the development of the plan. Several comments resulted in the re-evaluation of proposed high-

priority mitigation strategies. These comments also assisted with the development of the list of hazards to include in the plan. (For instance, mine subsidence was included in the landslide discussion as a result of these comments.)

First Update

To guide completion of the plan at the local level, a multi-jurisdictional core planning team was established. This team was comprised of key officials with a stake in mitigation and included the following:

- Mr. Randy Elliot, Marion County Commissioner
- Mr. Alan Parks, Marion County Commissioner
- Mr. Wayne Stutler, Marion County Commissioner
- Mr. Junior Slaughter, Marion County Sheriff
- Mr. Rodger Wilson, Fairmont Fire Department
- Mr. James Moore, Marion County Health Department
- Mayors of the cities of Fairmont, Mannington, and Pleasant Valley as well as the towns of Barrackville, Fairview, Farmington, Grant Town, Monongah, Rivesville, Whitehall, and Worthington
- Mr. Chris McIntire, Marion County Department of Homeland Security and Emergency Management Director
- Mr. James Kosik, Fairmont General Hospital
- Mr. Derek Eskew, JH Consulting, LLC

The first mitigation plan update was completed in the latter half of 2008 and through the early parts of 2009. The original HMC, with additions or changes in membership resulting from elections, new hires, etc., met a total of three times to update the plan. The Marion County Commission decided to hire a consultant to facilitate completion of the update; JH Consulting, LLC from Buckhannon, West Virginia, was chosen. The major items of revision included project updating, risk assessment re-analysis, updating project prioritization, and re-formatting the plan.

The first committee meeting was held on July 17, 2008, at the Marion County Courthouse at 2:00 P.M. This meeting was combined with an LEPC meeting. The contractor

discussed the additions to the hazard event list and generally the hazard inclusions into the risk assessment. Also, the contractor distributed questionnaires to each committee member, asking them to list the hazard to which they felt the community was most vulnerable along with a project to mitigate that hazard. The purpose of this exercise was to correlate public opinion to research findings. Committee members were also asked to assist in the development of a matrix to be used to prioritize updated mitigation projects.

The second committee meeting was advertised and opened to the public. (A public notice was printed in *The Times West Virginian*.) This meeting was held on October 16, 2008, at 1:00 P.M. at the Marion County Courthouse. The purpose of this meeting was to review draft risk assessment materials and approve the project list. The majority of the attendees were HMC members; however, representatives from the LEPC, Fairmont General Hospital, the county health department, Fairmont Fire Department, and a member of the general public were also in attendance.

Finally, a public meeting was held at the J. Harper Meredith Building on November 20, 2008, at 1:00 P.M. This meeting was advertised in *The Times West Virginian*. Marion County Health Department personnel, a member of the general public, Office of Emergency Management (OEM) personnel, a Fairmont General Hospital representative, and the contractor attended. As such, a sign-in sheet was not completed. Attendees simply ranked project groupings in an effort to determine a priority for updated mitigation projects.

In addition to these meetings, the contractor attended a LEPC meeting to discuss the status of the project. A variety of community members were involved throughout, as representatives from community assets were asked to indicate their opinions on hazard vulnerability and to suggest mitigation projects. Local officials (such as the county assessor, economic development representative, and a hospital operations official) were interviewed regarding hazard vulnerability. Further, a "Household Hazards Preparedness Questionnaire" was distributed to solicit comments from the general public. As a result, significant involvement from multiple sectors in Marion County contributed to the update of the plan despite poor attendance at scheduled public meetings. Additionally, letters will be sent to neighboring counties by the county Department of Homeland Security and Emergency Management to notify them of the plan update and completion. Letters will invite those counties to review the completed plan and offer comments or suggestions to better help the counties work together towards a common objective.

MONONGALIA COUNTY

Original Plan Development

To guide completion of the plan at the local level, a multi-jurisdictional core planning team was established. This team was comprised of key officials with a stake in mitigation and included the following:

- Monongalia County OEM
- Monongalia County Planning
- Monongalia County Health Department
- West Virginia University
- American Red Cross
- Morgantown Utility Board
- Monongalia County Schools
- Monongalia County Commission
- Town of Blacksville
- Town of Granville
- City of Morgantown
- Town of Star City
- City of Westover
- JH Consulting, LLC

The actions of project stakeholders were documented in *The Dominion Post*, Monongalia County's local newspaper. As such, the public was periodically updated as to the status of the plan's preparation. Further, with respect to the development of an action plan, three special stakeholders meetings and three general public meetings were scheduled to discuss formulation of the plan and ways in which county agencies could work together to implement identified mitigation strategies. It is significant to note that the project stakeholders had been meeting for approximately six months prior to the start of the action plan.

Public meetings were poorly attended. They were publicized in the local newspaper (the paper also provided coverage of the stakeholders meetings). The Monongalia County OEM staged the third of the public meetings on the local public access television channel with a call-in service for residents to voice their opinions. This program aired several times. No public comments were received as a result of the television program.

Feedback received from the stakeholders proved valuable in the development of the plan. Several comments were received that resulted in the re-evaluation of the proposed high-

priority mitigative actions as well as the risks that should be included in the plan. As a result, the plan was tailored to Monongalia County's specific needs.

The risk assessment phase of the mitigation plan was completed using a variety of research techniques. FEMA Geo-Hazards and other Internet sites were searched for historical hazard event records. R. D. Zande & Associates, Inc. conducted reviews of existing reports and plans which were on file with the Monongalia County OEM to assist in the determination of hazard susceptibility areas. Interviews and other discussions were conducted with numerous local officials (including first responders, insurance agents, and West Virginia Division of Highways officials) to ascertain the risks associated with particular hazards in specific areas of the county. After identifying the areas in which the hazards were most prominent, they were profiled and positioned into a base map of the county. This GIS-based map contained several layers with information regarding the individual hazards. Within each of the denoted "hazard risk areas," assets (structures, utilities, etc.) were inventoried and loss estimates were calculated for each of the inventoried assets with respect to that particular hazard. The general public of Monongalia County was further involved in the process as information was gathered from the county's assets to complete loss estimates. The OEM's contractor contacted representatives from each of these assets, explaining the process and collecting ideas.

In an effort to obtain greater public comment, the OEM's contractor provided and distributed Households Hazards Preparedness Questionnaires to members of the general public and county civic organizations. These questionnaires allowed members of the general public to participate in the process without requiring presentation in front of a crowd. These questionnaires were also a convenient form of participation in terms of work schedules, etc. The OEM received many completed questionnaires for inclusion into the planning document.

Governmental units in Monongalia County worked cooperatively to complete this Hazard Mitigation Plan. To show each entity's dedication to completing this project, a letter of agreement was signed by the entities preceding the start of the planning process. Following completion of the plan, all entities adopted formal resolutions to implement the plan in their jurisdictions.

First Update

The first mitigation plan update was completed throughout 2008 and in the first quarter of 2009. A total of three stakeholders meetings were held as part of the process (the last two of which were advertised and open to the public).

The purpose of the initial stakeholders meeting (held on March 7, 2008) was to re-familiarize the stakeholders group with each other and the hazard mitigation planning process. The OEM's contractor, JH Consulting, LLC, reviewed items that would be updated. The contractor further solicited input from the committee. Committee members were asked to write down one hazard and one project for their jurisdictions. They were further asked to assist in developing project prioritization criteria. In general, items that were updated include the following:

- Update historical hazard data to include events that have occurred since the initial adoption of the plan
- Update the asset inventory
- Detail flood hazards (to include repetitive loss properties)
- Update the hazard status (to include creation of new strategies)
- Re-prioritize mitigation projects
- Strengthen the municipal presence in the plan

The October 17, 2008, meeting was held primarily to finalize the hazards to be included (based on research that had been since the first stakeholders meeting) and to begin the process of updating the goals, objectives, and strategies list. On November 7, 2008, the stakeholders group met to review the updated project list and prioritize mitigation strategies.

The October and November meetings were advertised and open to the public. No representatives from the public attended. In an effort to facilitate ongoing public participation, the OEM intends to publish a press release – upon the completion of this update – inviting the public to review the document at a variety of locations (likely the administrative offices of the participating jurisdictions). A "public comment form" will be provided. If any member of the public wishes to comment on the plan, it will be documented for inclusion in the next update cycle.

PRESTON COUNTY

At the direction of the Preston County OEM, Preston County and its municipalities have developed and conducted the first update to their Multi-Jurisdictional Hazard Mitigation Plan in a continuing effort to indicate probable hazard risks, profile future hazard events, estimate

damage and losses as a result of future hazard events, and advocate mitigative projects to reduce the effects of the identified hazards on the communities within the county. The plan's aim is to create safer, more disaster-resistant communities.

The Preston County Commission compiled a HMC, known as project stakeholders, to be responsible for the development, implementation, and updating of the plan. The committee included primarily representatives from the municipalities within the county and the emergency services organizations within the county (fire, police, EMS etc.). Other organizations that were involved in the process included local utility providers, health care providers, and R.D. Zande & Associates, Inc.

The actions of the project stakeholders were continually documented in the local media, such as the local radio station and newspaper. As such, participating jurisdictions and the public were updated as to the status of the plan's preparation and the repercussions of not completing a plan. Further, with respect to the development of an action plan, one special stakeholders meeting and two general public meetings were scheduled to discuss formulation of the plan and suggest mitigation strategies. During the updating process, two public meetings and one stakeholders meeting were held to review the existing plan and make necessary revisions based on changes that have taken place since the original plan was developed.

Feedback received from the HMC and the public proved valuable in the development and updating of the plan. Several comments were received that resulted in the re-evaluation of the risks that should be included in the plan as well as mitigation strategies that should be implemented. The public which participated showed a strong desire to be educated as to what it could do to assist in mitigation efforts.

As a result, the plan has been tailored to Preston County's specific needs and will prove to be a document county residents can feel ownership of and utilize to make decisions to reduce their vulnerability to hazards.

Methodology

The risk assessment phase of the mitigation plan was completed and updated using a variety of research techniques. FEMA Geo-Hazards and other Internet sites were searched for historical hazard event records. R. D. Zande & Associates Inc. conducted searches of local newspaper archives as well as existing reports and plans, which were on file with the governing bodies in the county, to assist in the determination of hazard susceptibility areas. Interviews and other discussions were conducted with numerous local officials (including first responders,

insurance agents, and West Virginia Division of Highways officials) to ascertain the risks associated with particular hazards in specific areas of the county. After identifying the areas in which the hazards were most prominent, they were profiled and positioned into a base map of the county. This GIS-based map contains several layers with information regarding the individual hazards. Within each of the denoted "hazard risk areas," assets (structures, utilities etc.) were inventoried and loss estimates were calculated for each of the inventoried assets with respect to that particular hazard. The general public of Preston County was further involved in the process as information was gathered from the county's assets to complete loss estimates. The county's contractor contacted representatives from each of these assets, explaining the process and collecting ideas.

Following completion of the updated risk assessment, the HMC used information such as the hazard profiles and loss estimations to formulate mitigation goals, objectives, and strategies. For this phase of the project, the HMC met separately to discuss baseline strategies. Such an action was reasoned to be most appropriate, as project stakeholders are individuals who deal with hazard events on a regular basis and will be directly affected by the implementation of the plan. Members of the HMC were notified via memoranda and telephone correspondence from the OEM. The stakeholders' ideas were used as a starting point for further planning steps.

The baseline mitigation strategies were presented to the public at the general public meetings to ensure fair participation of all sectors of the county. These meetings were not well attended by the general public, but those in attendance provided valuable insight that was used in the development and updating of the plan. (The HMC was represented well at the public meetings.) The meeting was publicized at public county commission meetings as well as repeatedly in the local newspaper and on the local radio station. Local media providers also provided coverage of the meetings themselves as a way to further update county residents as to the status of the plan.

In an effort to obtain greater public comment, the commission's contractor provided and distributed Households Hazard Preparedness Questionnaires to members of the general public. These questionnaires allowed members of the general public to participate in the process without requiring presentation in front of a crowd. The questionnaires were also a convenient form of participation in terms of work schedules, etc. However, the Preston County Commission received few completed questionnaires for inclusion into the planning document.

Formal Adoption of the Plan

The Preston County Commission and representatives from each of the county's municipalities worked cooperatively to complete and update this Hazard Mitigation Plan. To show each entity's dedication to completing and updating this project, a letter of agreement was signed by each entity preceding the start of the planning process. Following completion of the original plan and updated plan, all entities adopted formal resolutions to implement the plan in their jurisdictions.

Copies of the adopting documents are included in the plan. Also, a letter was sent to appropriate organizations and civic groups throughout Preston County, notifying them of the adoption of the plan and the plan's relevance to them. A copy of the form letter used is also included.

TAYLOR COUNTY

At the direction of the Taylor County Office of Emergency Services (TCOES), Taylor County and its municipalities have developed and conducted the first update to their Multi-Jurisdictional All-Hazards Mitigation Plan in a continuing effort to indicate probable hazard risks, profile future hazard events, estimate damage and losses as a result of future hazard events, and advocate mitigation projects to reduce the effects of the identified hazards on the communities within the county. The plan's aim is to create safer, more disaster-resistant communities. The following plans were integrated into this plan:

- Taylor County Multi-Jurisdictional All-Hazards Mitigation Plan, 2003;
- Taylor County Emergency Operations Plan
- Taylor County Continuity of Operations Plan

This plan will be utilized to assist in developing future land use planning in Taylor County as well as all other emergency planning efforts.

The planning process utilized in Taylor County was based on Section 322 local planning requirements of the Disaster Mitigation Act of 2000 and supporting guidance documents developed by FEMA and the West Virginia Division of Homeland Security and Emergency Management (WVDHSEM). The planning process included the following steps, which were described in greater detail throughout the plan:

- Step 1: Establishment of a Core Planning Team
- Step 2: Conducting a Hazard Risk Assessment
- Step 3: Developing a Capabilities Assessment
- Step 4: Creating a Mitigation Plan
- Step 5: Adopt and Implement Plan

The original process in 2003 was led by Taylor County Commission and supported by the planning and engineering firm R. D. Zande & Associates, Inc. This current, updated version was compiled by TCOES staff and its Risk Assessment and Mitigation Planning Committee Members as well as Stantec Consulting Services, Inc.

TAYLOR COUNTY RISK ASSESSMENT AND MITIGATION PLANNING COMMITTEE

NAME	ORGANIZATION
Mark Knotts	TCOES, Director
Jeff Leach	Taylor County Emergency Communications, 911 Director
Dave Goble	County Commission of Taylor County, President
Bob Weaver	County Commission of Taylor County
Nancy Fowler	Taylor County Clerk
Robert Beltner	Taylor County Sheriff
Wayne Beall	Grafton Volunteer Fire Department
Roger Jefferson	WVDHSEM, State Hazard Mitigation Planner
Richard Rein	FEMA Region III
Doug Britvec	Stantec Consulting Services Inc.

Risk Assessment and Mitigation Planning Committee

One of the early acts of the Taylor County Risk Assessment and Mitigation Planning Committee was to establish a Risk Assessment and Mitigation Planning Committee to examine the community's risks and vulnerabilities to natural, technological, and man-made hazards. This committee, originally formed in February 2003, comprises representatives from federal, state, county, municipal, and private entities.

Due to recent federal regulations requiring local hazard mitigation plans, Taylor County decided to allocate the bulk of its funding and resources to hazard identification, risk assessment, and hazard mitigation planning activities. The Risk Assessment and Mitigation

Planning Committee was tasked with most of the activities related to the development of this plan and was considered the Core Planning Team. Committee members have worked throughout the process from the initial crafting of the original Multi-Jurisdictional All-Hazards Mitigation Plan to the development, revision, and updating of the plan.

TAYLOR COUNTY ALL-HAZARD MITIGATION PLANNING PROCESS TIMELINE

DATE	ACTIVITY	PURPOSE
February 2003	Partnerships formed with community	Establish project partnership
	Risk Assessment/Mitigation Planning Committee formed	Begin risk assessment and mitigation planning process
March 2003	Contacted surrounding communities	Examples of hazard mitigation plans
	Mitigation 101 Educational Workshop	Conducted for Risk Assessment/Mitigation Planning Committee
	Kick-off meetings	For public officials and general public
	Legal notice in the local newspaper	Notification of public meeting
April-June 2003	Risk Assessment/Mitigation Planning Committee meetings	Data collection
May 2003	Gather existing information from agencies	Data collection
June 2003	Obtained WVDHSEM Hazard Mitigation Planning Workshop information	Obtain additional information about mitigation planning and state support
	Risk Assessment/Mitigation Planning Committee Meeting	Focus on risk assessment-data collection, hazard identification
July 2003	Draft risk assessment and maps submitted	Review by core planning team and Core Planning Team
	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Present draft risk assessment and obtain comments
	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Develop goals and objectives for mitigation plan
August 2003	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Develop mitigation strategies
	Draft Plan submitted	For review by core planning team and steering committee
	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Present draft plan and obtain comments
September 2003	Public comment period	Obtain public comments
	Core Planning Team meeting	Final plan review

TAYLOR COUNTY ALL-HAZARD MITIGATION PLANNING PROCESS TIMELINE (CONTINUED)

DATE	ACTIVITY	PURPOSE
October 2003	Plan to WVDHSEM for review	Obtain state comments
	Final plan submitted to Taylor County	Final version with revision incorporated
	Taylor County Commission meeting	Presentation of plan for adoption
	Grafton City Council meeting	Presentation of plan for adoption
	Flemington Town Council meeting	Presentation of plan for adoption
May 2007	WVDHSEM-Mitigation Department (Taylor County received fax regarding review process of the All Hazard Mitigation Plan and new update requirements)	Notify the county regarding review process
August 2008	TCOES Staff meeting	Review process and prepare for kick-off meeting to update the plan
September 2008	Kick off meeting	Discuss updating the plan
	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Focus on risk assessment – data collection, hazard identification for five-year update
	Risk Assessment/Mitigation Planning Committee (Core Planning Team) meeting	Focus on risk assessment goals and objectives for five-year update
October 2008	Risk Assessment/Mitigation Planning Committee (Core Planning Team) plan update meeting	Focus on updating the loss estimations section; goals, objectives and strategies section, and all remaining sections
	Legal notice in the local newspaper	Notification of public meeting
	Public comment period	Obtain public comments
	Core Planning Team meeting	Final plan review
	Plan to WVDHSEM for review	Obtain state comments
	Final plan submitted to Taylor County	Final version with revision incorporated
	Taylor County Commission meeting	Presentation of plan for adoption
	Grafton City Council meeting	Presentation of plan for adoption

Public Involvement

Throughout the initial process in 2003, there were several opportunities for public input. Two public meetings were held at different stages in the process; the first public meeting to announce the kick-off of the project and describe the planning process and the second public meeting to present the initial findings of the draft risk assessment. Each of the meetings was advertised through legal notices in the local newspaper, *The Mountain Statesman*. The actions of the project stakeholders were documented in *The Mountain Statesman*; as such, the public

was updated as to the status of the plan's preparation. Copies of the Taylor County Hazard Risk Assessment and draft plan were made available for the public at various viewing locations in the county and the municipalities. Information about the planning process and copies of planning documents were also made available on the Taylor County website to allow the public, neighboring communities, businesses representative, academia, nonprofit organizations, and other interested parties to view them.

During the revision of this document, the public has been invited to attend the Risk Assessment Committee Meeting. Copies of the updated/revised risk assessment plan were made available for the public at the TCOES during regular business hours.

Methodology

The hazard risk assessment phase of the mitigation plan was completed and updated using a variety of research techniques. FEMA Geo-Hazards and other Internet sites were searched for historical hazard event records. Stantec Consulting Services Inc. conducted searches of local newspaper archives and existing reports and plans on file with the governing bodies in the county to assist in the determination of hazard susceptibility areas. Interviews and other discussions were conducted with numerous local officials (including first responders, insurance agents, and West Virginia Division of Highways officials) to ascertain the risks associated with particular hazards in specific areas of the county. After identifying the areas in which the hazards were most prominent, they were profiled and positioned into a base map of the county. This GIS-based map contains several layers with information regarding the individual hazards. Within each of the denoted "hazard risk areas," assets (structures, utilities etc.) were inventoried and loss estimates were calculated for each of the inventoried assets with respect to that particular hazard. The general public of Taylor County was further involved in the process as information was gathered from the county's assets to complete loss estimates. The county's contractor contacted representatives from each of these assets, explaining the process and collecting ideas.

Following completion of the updated risk assessment, the HMC used information such as the hazard profiles and loss estimations to formulate mitigation goals, objectives, and strategies. For this phase of the project, the HMC met separately to discuss baseline strategies. Such an action was reasoned to be most appropriate, as project stakeholders are individuals who deal with hazard events on a regular basis and will be directly affected by the implementation of the plan. Members of the HMC were notified via memoranda and telephone

correspondence from the County Commission. The stakeholders' ideas were used as a starting point for further planning steps. The baseline mitigation strategies were presented to the public at the general public meetings to ensure the fair participation of all sectors of the county.

Risk Assessment and Mitigation Planning Committee/Public Meetings

Stakeholders Meeting #1 (March 12, 2003)

The mitigation planning phase of the county's Multi-Jurisdictional All-Hazard Mitigation Plan project began with Stakeholders (Core Planning Team) Meeting #1. Several representatives from county agencies attended the meeting. Three items were addressed at the meeting. First, the stakeholders reviewed the completed hazard risk assessment. The Taylor County Commission's contractor (R. D. Zande & Associates, Inc.) addressed any questions.

Secondly, the stakeholders reviewed and amended an outline of the project schedule. Stakeholders discussed the appropriate number of general public forums to facilitates as well as the style of public meetings to have (e.g., charette, hearing, etc.). The stakeholders decided to have two general public meetings. Meetings were scheduled at the Taylor County Courthouse Annex on March 19 and 20 at 6:30 P.M. and 3:00 P.M., respectively. These meetings were scheduled so as to allow maximum opportunity for the public to attend. Stakeholders also decided, as an outreach effort, to distribute household hazard preparedness questionnaires to civic groups throughout the county.

Thirdly, stakeholders generated baseline mitigation goals, objectives, and strategies. The stakeholders represent a broad range of county interests and used that range to generate mitigation goals, objectives, and strategies for many of the hazards identified in the risk assessment. These baselines were used during the general public forums as a means of spurring ideas. They were also analyzed by the general public and revised as necessary. Utility failure, hazardous materials incidents, winter storms, and flooding were particularly addressed as hazards that could be effectively mitigated.

General Public Forum #1 (March 19, 2003)

General Public Forum #1 was held on Wednesday, March 19, 2003, in the Commission Meeting Room at the Taylor County Courthouse Annex in Grafton, West Virginia. The Taylor County Courthouse Annex is centrally located and easily accessible by all county residents.

The meeting was scheduled at 6:30 P.M. There was very little public involvement at this general public forum.

General Public Forum #2 (March 20, 2003)

As a continuing effort to obtain public comment on the county's Multi-Jurisdictional All-Hazard Mitigation Plan, the Taylor County Commission and its contractor (R. D. Zande & Associates, Inc.) held a second general public meeting. General Public Forum #2 was held on Thursday, March 20, 2003, at the Taylor County Courthouse Annex in Grafton, West Virginia. The meeting was conducted in a charette-style format with representatives from R. D. Zande & Associates present to answer questions about the various aspects of the mitigation planning process. Taylor County Commission representatives were present to answer questions specifically about the county's Mitigation Plan. There was very little public involvement at this general public meeting.

Formal Adoption of the Plan

The Taylor County Multi-Jurisdictional All-Hazards Mitigation Plan was developed as a multi-jurisdictional plan; therefore, to meet the requirements of Section 322, the final plan was adopted by each of the municipalities as well as the county. Attached to this plan are the signed adoption letters for the county and each municipality.

The County Commission of Taylor County and representatives from each of the county's municipalities worked cooperatively to complete and update this Multi-Jurisdictional All-Hazards Mitigation Plan. Following completion of the original plan and updated plan, all entities adopted formal resolutions to implement the plan in their jurisdictions.

	Yes	No
1. Do you know where your greatest damages may occur in your hazard areas?	X	
2. Do you know whether your critical facilities will be operational after a hazard event?	X	
3. Is there enough data to determine which assets are subject to the greatest potential damages?	X	
4. Is there enough data to determine whether significant elements of the community are vulnerable to potential hazards?	X	
5. Is there enough data to determine whether certain areas of historic, environmental, political, or cultural significance are vulnerable to potential hazards?	X	
6. Is there concern about a particular hazard because of its severity, repetitiveness, or likelihood of occurrence?	X	
7. Is additional data needed to justify the expenditure of community or state funds for mitigation initiatives?		X

APPENDIX G -
2017 REGION VI
HAZUS & TEIF SUMMARY REPORT

FLOOD HAZARD AND IDENTIFICATION OF FLOOD RISK

Chapter II, Section B-4 above clearly established that flooding is a significant hazard within the region in which much of the development throughout the region is concentrated in valleys where water accumulates. FEMA Region III's Total Exposure In Floodplain Version 2.0 (TEIF 2.0) methodology was utilized to profile flood impacts to the region. The TEIF 2.0 methodology incorporates data from FEMA's HAZUS-MH inventory of building value by Census Block that is evenly dispersed to West Virginia Statewide Addressing and Mapping 9-1-1 Address Points; where the address points are a proxy for insurable buildings/structures. The core steps of the analysis methodology includes the following:

1. Distributing the estimated building values at the Census Block-level from HAZUS to each of the respective addresses.

2. Identifying which addresses exist within the FEMA effective Special Flood Hazard Area (SFHA).

3. Tallying or summarizing values by community (based on the FEMA CID and discounting State and/or Federal-level CID's).

4. Ranking the risk by estimated dollar loss.

Each of the various summary tables presented include a relative color-coding to help exemplify the difference between statistical categories (e.g., by community, value or rank). The relative scales follow a high to low color-coding scale. Users are cautioned to note that an individual "Legend" is not provided for every single table presented. Users should simply consider the rankings based on a high to low scale continuum (Red to Green). The Legend presented at right is therefore representative.

Rank Value/Color: High	1
	2
Rank Value / Color: Medium	3
	4
Rank Value / Color: Low	5

TEIF 2.0 100-Year Flood Event

As noted, the TEIF 2.0 methodology utilizes the effective FEMA Special Flood Hazard Area (SFHA), which includes the 100-year flood event. The 100-year or 1% Annual Chance Flood Frequency, is a flood event with a 1% chance of being equaled or exceeded in any single year. In order to better understand the flood risk, we first take a look at the total potential building exposure. Total potential building exposure has been extracted from HAZUS-MH which is represented by census block in MAP 1 – Hazus Flood Total Building Exposure By Block and summarized by community in the table below; please see Table 1 - TEIF 2.0 Flood Building Exposure & Population Ranking:

Table 1 - TEIF 2.0 Flood Building Exposure & Population Ranking

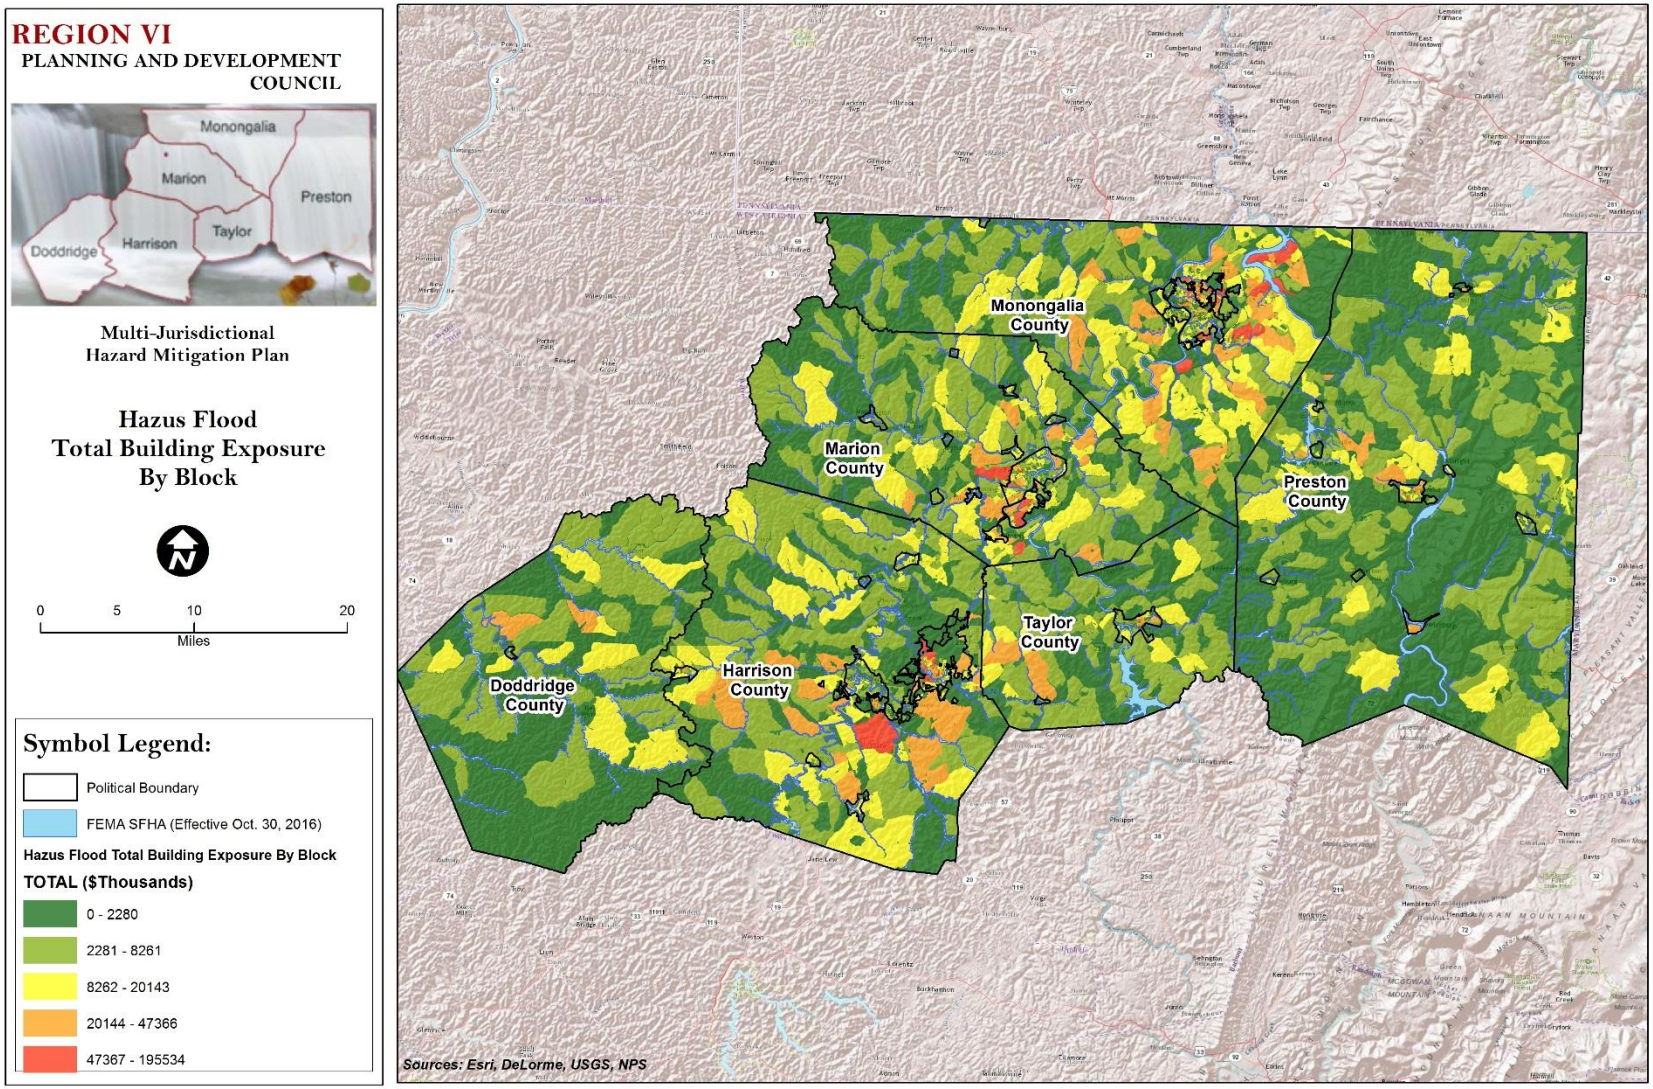

Rank By Building Value	County	Political Name	FEMA CID	Total Building Value	Pop 2010
1	Monongalia	Monongalia County (Unincorporated)	540139	$6,049,914,000	59769
2	Monongalia	City of Morgantown	540141	$3,445,487,000	29660
3	Harrison	Harrison County (Unincorporated)	540053	$2,816,754,000	34414
4	Marion	Marion County (Unincorporated)	540097	$2,453,578,000	27020
5	Marion	City of Fairmont	540099	$2,345,237,000	18704
6	Preston	Preston County (Unincorporated)	540160	$2,290,937,000	26273
7	Harrison	City of Clarksburg	540056	$1,951,636,000	16578
8	Harrison	City of Bridgeport	540055	$1,511,038,000	8149
9	Taylor	Taylor County (Unincorporated)	540188	$961,702,000	11419
10	Taylor	City of Grafton	540190	$564,679,000	5164
11	Doddridge	Doddridge County (Unincorporated)	540024	$544,230,000	7377
12	Preston	City of Kingwood	540254	$454,846,000	2939
13	Monongalia	City of Westover	540274	$452,619,000	3983
14	Marion	City of Pleasant Valley	540292	$416,215,000	3149
15	Harrison	City of Shinnston	540060	$237,660,000	2201
16	Harrison	Town of Nutter Fort	540059	$213,052,000	1593
17	Marion	City of Mannington	540103	$206,006,000	2063
18	Monongalia	Town of Star City	540273	$195,052,000	1825
19	Harrison	City of Salem	540242	$185,202,000	1586
20	Harrison	Town of Stonewood	540061	$174,051,000	1806
21	Harrison	Town of Anmoore	540054	$154,599,000	770
22	Preston	Town of Terra Alta	540257	$130,844,000	1477
23	Marion	Town of White Hall	545556	$130,570,000	648
24	Marion	Town of Barrackville	540098	$128,254,000	1302
25	Doddridge	Town of West Union	540025	$122,339,000	825
26	Marion	Town of Monongah	540104	$89,421,000	1044
27	Marion	Town of Rivesville	540105	$87,090,000	934
28	Preston	Town of Rowlesburg	540163	$71,317,000	584
29	Harrison	Town of Lumberport	540058	$66,680,000	876
30	Marion	Town of Grant Town	540102	$57,086,000	613
31	Monongalia	Town of Granville	540272	$56,972,000	781
32	Marion	Town of Farmington	540101	$55,712,000	375
33	Preston	Town of Brandonville	540284	$50,990,000	101
34	Preston	Town of Reedsville	540269	$50,809,000	593
35	Harrison	Town of Lost Creek	540057	$49,250,000	496
36	Harrison	Town of West Milford	540062	$48,709,000	630
37	Marion	Town of Fairview	540100	$42,147,000	408
38	Preston	Town of Masontown	540270	$41,551,000	546
39	Preston	Town of Newburg	540268	$30,889,000	329

Rank By Building Value	County	Political Name	FEMA CID	Total Building Value	Pop 2010
40	Taylor	Town of Flemington	540189	$20,855,000	312
41	Preston	Town of Bruceton Mills	540162	$18,270,000	85
42	Preston	Town of Albright	540161	$17,836,000	299
43	Preston	Town of Tunnelton	540137	$17,552,000	294
44	Monongalia	City of Blacksville	540140	$14,933,000	171
45	Marion	Town of Worthington	540106	$13,990,000	158

Naturally we see all of the counties near the top of the rankings given their large geographic areas, which in many instances are on-par with the larger population centers (i.e., cities) such as Morgantown, Fairmont, Clarksburg, Bridgeport and Grafton. Furthermore, we also know that each of these cities are located within the regional primary growth areas[1] per the Regional Strategic Plan; see MAP 2 - Total Building Exposure (& Rank),TEIF 2.0 Flood Hazard by Community which demonstrates the summarized distribution of building exposure and location of the Top-ten communities from Table 1 above.

10	Taylor	City of Grafton	540190	$564,679,000	375

The following applies to a 100-year flood:

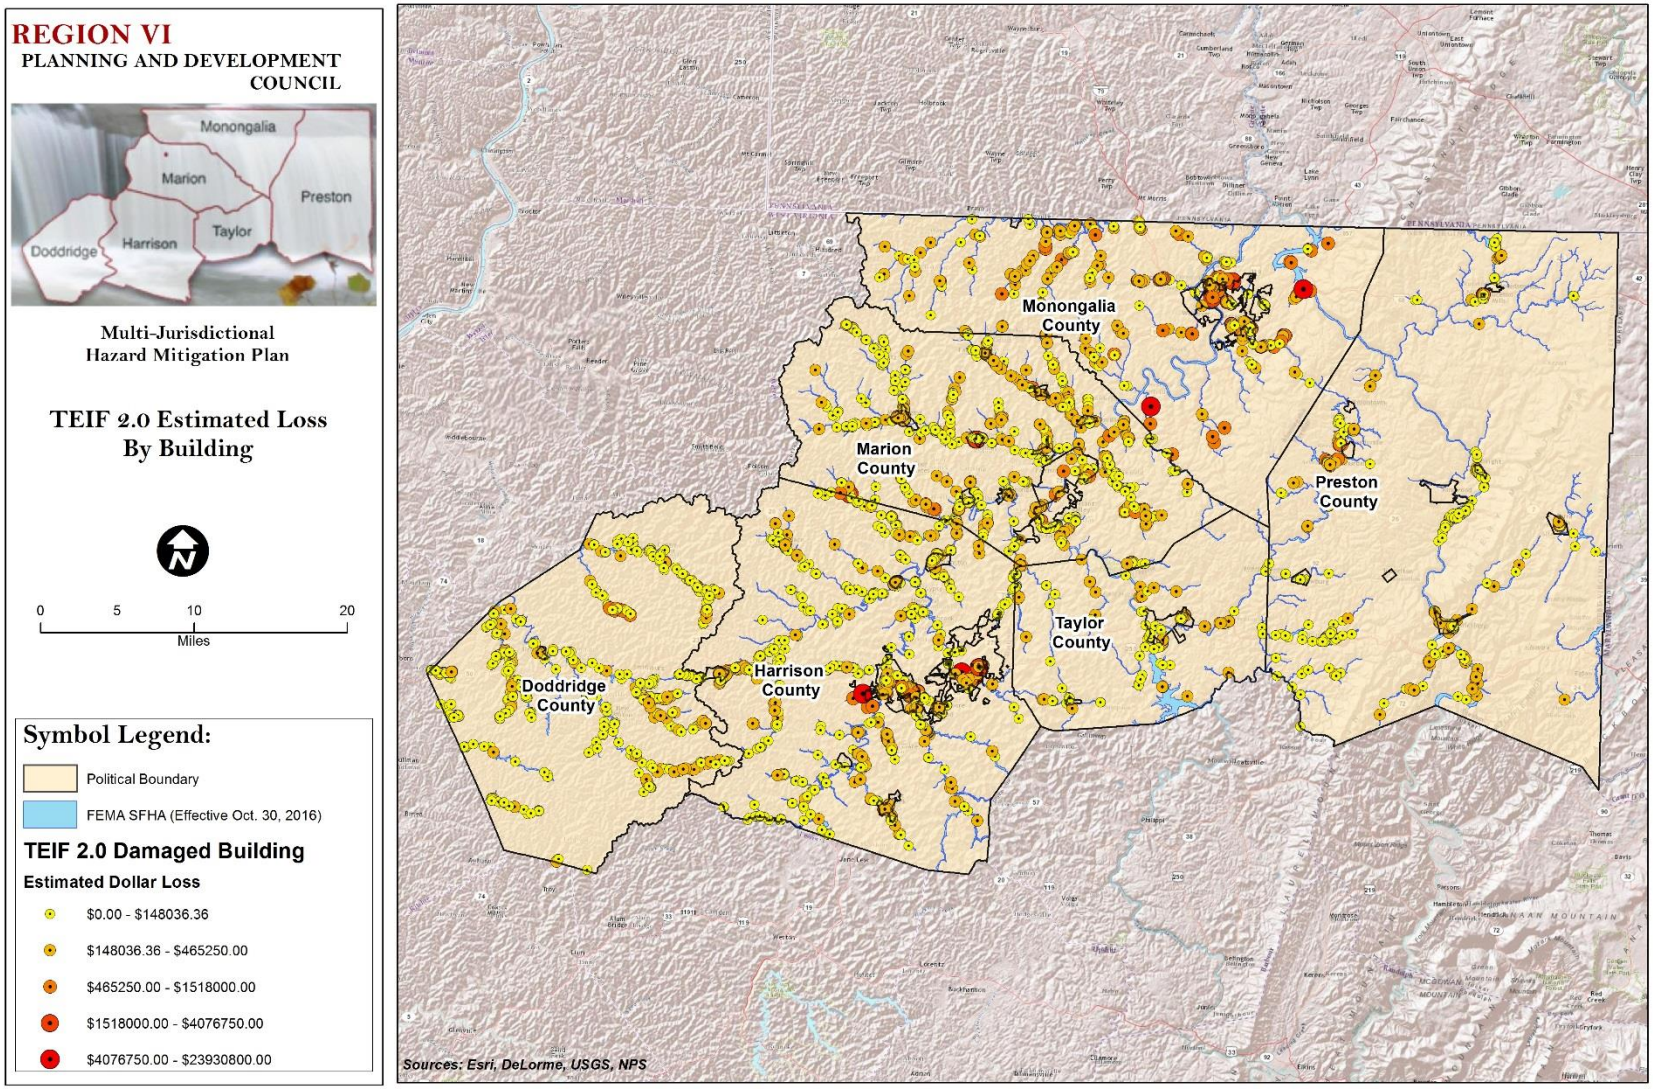

The raw TEIF 2.0 results by Building (i.e., address point) are represented by MAP 3 - TEIF 2.0 Estimated Loss By Building. As is expected, the spatial pattern of affected address points are found along watercourses and the greatest dollar losses are associated with buildings having the greatest estimated value. Users however should be cautioned to recall that the TEIF 2.0 method is a relatively crude method of estimating the value of an individual building and therefore future analysis can include more accurate methods of determining building value. Notwithstanding, the data does emulate that which is expected, in that greatest loss values are found in and around the major population centers.

Raw losses at the individual building have subsequently been summarized by community (FEMA CID) in order to determine risk for each community within the Region. FEMA's TEIF 2.0 Methodology indicates the greatest risk, in terms of sheer dollar losses, can be attributed to the unincorporated portions of Monongalia County; see Table 2 – FEMA REGION III – Total Exposure In Floodplain Version 2 (TEIF 2) - Rank By Dollar Loss Estimate. Furthermore, we also see five of the six counties in the top ten rankings which is no surprise given the relative large area as compared to various towns and cities; see MAP 4 - Dollar Loss (& Risk Rank), TEIF 2.0 Flood Hazard by Community. However, if the same TEIF 2.0 data/information is normalized by the total inventory of building value in relation to the estimated total exposure within the FEMA SFHA, it can be seen that the Town of Farmington is at the greatest relative risk; see Table 3 – FEMA REGION III – Total Exposure In Floodplain Version 2 (TEIF 2) - Rank By Loss Ratio. Given the adjustment to the manner in which the data is portrayed, we can see that a series of much smaller communities (Towns & Cities) throughout the PDC are more vulnerable to flooding than the larger counties – the exception being Doddridge County with a loss ratio-based rank of nine (9); see MAP 5 – Loss Ratio (& Risk Rank), TEIF 2.0 Flood Hazard by Community.

Appropriate mitigation actions can be developed around strategies for reducing both total loss and/or the loss percentage. Flood risk reduction strategies at the PDC-level are likely focused on reducing the overall flood risk via community-wide programs such as communications, zoning, construction code, evacuation planning, response or the management of natural storage. Dissemination and communication of risk in a variety methods can be leveraged by the PDC and each community as it each entity seeks to assist individual home owners and business owners mitigate specific structures. Consequently, local users are strongly encouraged to leverage the TEIF 2.0 GIS data that has been provided by the West Virginia Division of Homeland Security and Emergency Management and FEMA Region III.

However, in support of both further understanding the raw TEIF 2.0 loss results as well as providing specific data to support mitigation actions, a local impact table has been developed to better characterize the individual raw TEIF 2.0 Flood results. The individual building records have been summarized by community and site-type description to help target specific sub-sets of buildings that local officials may want to consider further and develop mitigation strategies around such sub-types. Please see Table 4 – TEIF 2.0 Flood Local Impact Table.

NOTES:

A - Because TEIF 2.0 is only being produced for a subset of communities throughout the State, TEIF 2.0 results are only ranked within the PDC.

1. Total Exposure in Floodplain (TEIF) 2.0 was created using Statewide E-911 Address Points. Hazus building value data was subsequently dispersed proportionately to the points evenly based on count. TEIF is intended to evaluate potential risk or economic loss in a dollar amount per community based on Hazus General Building Stock (Total Exposure) Values from FEMA's Hazus Version 2.2.

2. TEIF 1.0 was created using 2000 (Updated 2010 Version) and 2010 Census Data (Building Count and Shapefiles) to perform binomial areal interpolation to calculate risk values per community.

3. Average Annualized Loss (AAL) was created as a national level FEMA Risk Assessment product.

EARTHQUAKE HAZARD AND IDENTIFICATION OF EARTHQUAKE RISK

The HAZARD PROFILE of earthquake indicates a relatively low risk and Hazus-MH modeling results indicate the same. However, low risk does not indicate no risk. The Hazus-MH probabilistic earthquake scenario was utilized to estimate damage and loss from potential ground-shaking hazards. Hazus probabilistic ground-shaking methodology is characterized by spectral contour maps developed by the United States Geological Survey (USGS) as part of 2008 update of the National Seismic Hazard Maps (http://earthquake.usgs.gov/hazards/products/conterminous/2008/update_200812.php). USGS probabilistic seismic hazard maps are revised about every six years to reflect newly published or thoroughly reviewed earthquake science and to keep pace with regular updates of the building code.

The HAZUS Methodology includes maps for eight probabilistic hazard levels: ranging from ground shaking with a 39% probability of being exceeded in 50 years (100 year return period) to the ground shaking with a 2% probability of being exceeded in 50 years (2500 year return period). Specifically, the Probabilistic Hazard assumes a magnitude earthquake of 7.0 and includes multiple frequency event analyses of 100-, 250-, 500-, 750-, 1000-, 1500-, 2000-, and 2500- year events. The USGS data compiled in HAZUS is for ground shaking demand corresponding to VS 30 of 760 m/s (Site Class B / C). The multi-frequency analysis inherent to the Probabilistic Hazard produces annualized economic loss values for direct economic loss to the structure and other non-structural components.

The Hazus earthquake model operates solely at the census tract-level and therefore all tract-based inventory data and subsequent modeling results have been adjusted through area-weighting to characterize the risk at the community-level. The raw tract-based inventory of exposure is depicted in MAP 6 - Total Exposure By U.S. Census Tract. TABLE 5 – Total Exposure By Community below demonstrates the tract data distributed and summarized by community.

TABLE 5 – Total Exposure By Community

CID	Community Name	County	Total Inventory (Building and Contents)

WVPCD6 Total			**$47,503,640,050**	**N/A**

Naturally we see all of the counties near the top of the rankings given their large geographic areas, which in many instances are on-par with the larger population centers (i.e., cities) such as Morgantown, Fairmont, Clarksburg, Bridgeport and Grafton. Furthermore, we also know that

each of these cities are located within the regional primary growth areas[2] per the Regional Strategic Plan; see MAP 7- Total Exposure By Community which demonstrates the summarized distribution of exposure.

[2] Regional Development Plan Comprehensive Economic Development Strategy Plan FY 2009-2013, Page 97.

The raw earthquake probabilistic results by tract are represented by MAP 8 – Total Annualized Loss for Earthquake Hazard by U.S. Census Tract. As is expected, the spatial pattern of loss are found in and around major regional population centers; namely the regions cities - City of Bridgeport, City of Clarksburg, City of Fairmont, City of Morgantown, City of Grafton and City of Kingwood.

Raw annualized losses by tract have been summarized by community (FEMA CID) in order to determine risk for each community within the Region. Readers should be aware that Hazus does not include tables of losses for each of the individual frequency events and only reports the annualized estimate of economic loss. FEMA's Hazus –MH Probabilistic Earthquake Methodology indicates the greatest risk, in terms of sheer annualized dollar losses, can be attributed to the unincorporated portions of Monongalia County; see Table 6 - Earthquake Total Annualized Losses By Community (Sorted & Ranked By Dollar Loss). Furthermore, we also see all six counties in the top rankings which is no surprise given the relative large area as compared to various towns and cities; see MAP 9 – Total Annualized Loss for Earthquake Hazard by Community. However, if the same TEIF 2.0 data/information is normalized by the total inventory of building value in relation to the estimated total exposure within the FEMA SFHA, it can be seen that the Town of West Union is at the greatest relative risk; see Table 7 - Earthquake Total Annualized Losses By Community (Sorted & Ranked By Loss Ratio). Given the adjustment to the manner in which the data is portrayed, we can see that communities towards the western portion of the Region are at greater risk, which essentially emulates the propagation of ground waves from the higher incidence of faults to the southwest (New Madrid Seismic Zone); see MAP 10 – Loss Ratio for Earthquake Hazard by Community.

Given the minimal impact to the region from the probabilistic method the Hazus summary reports do not include much content of significance. The following are notable statistics within the summary reports:

Hazus Quick Assessment Report (QAR) indicates less than twenty (<20) casualties at all times analyzed (2AM, 2PM and 5PM) in all four casualty categories (Severity Level 1 to Level 4) where severity levels are defined as:

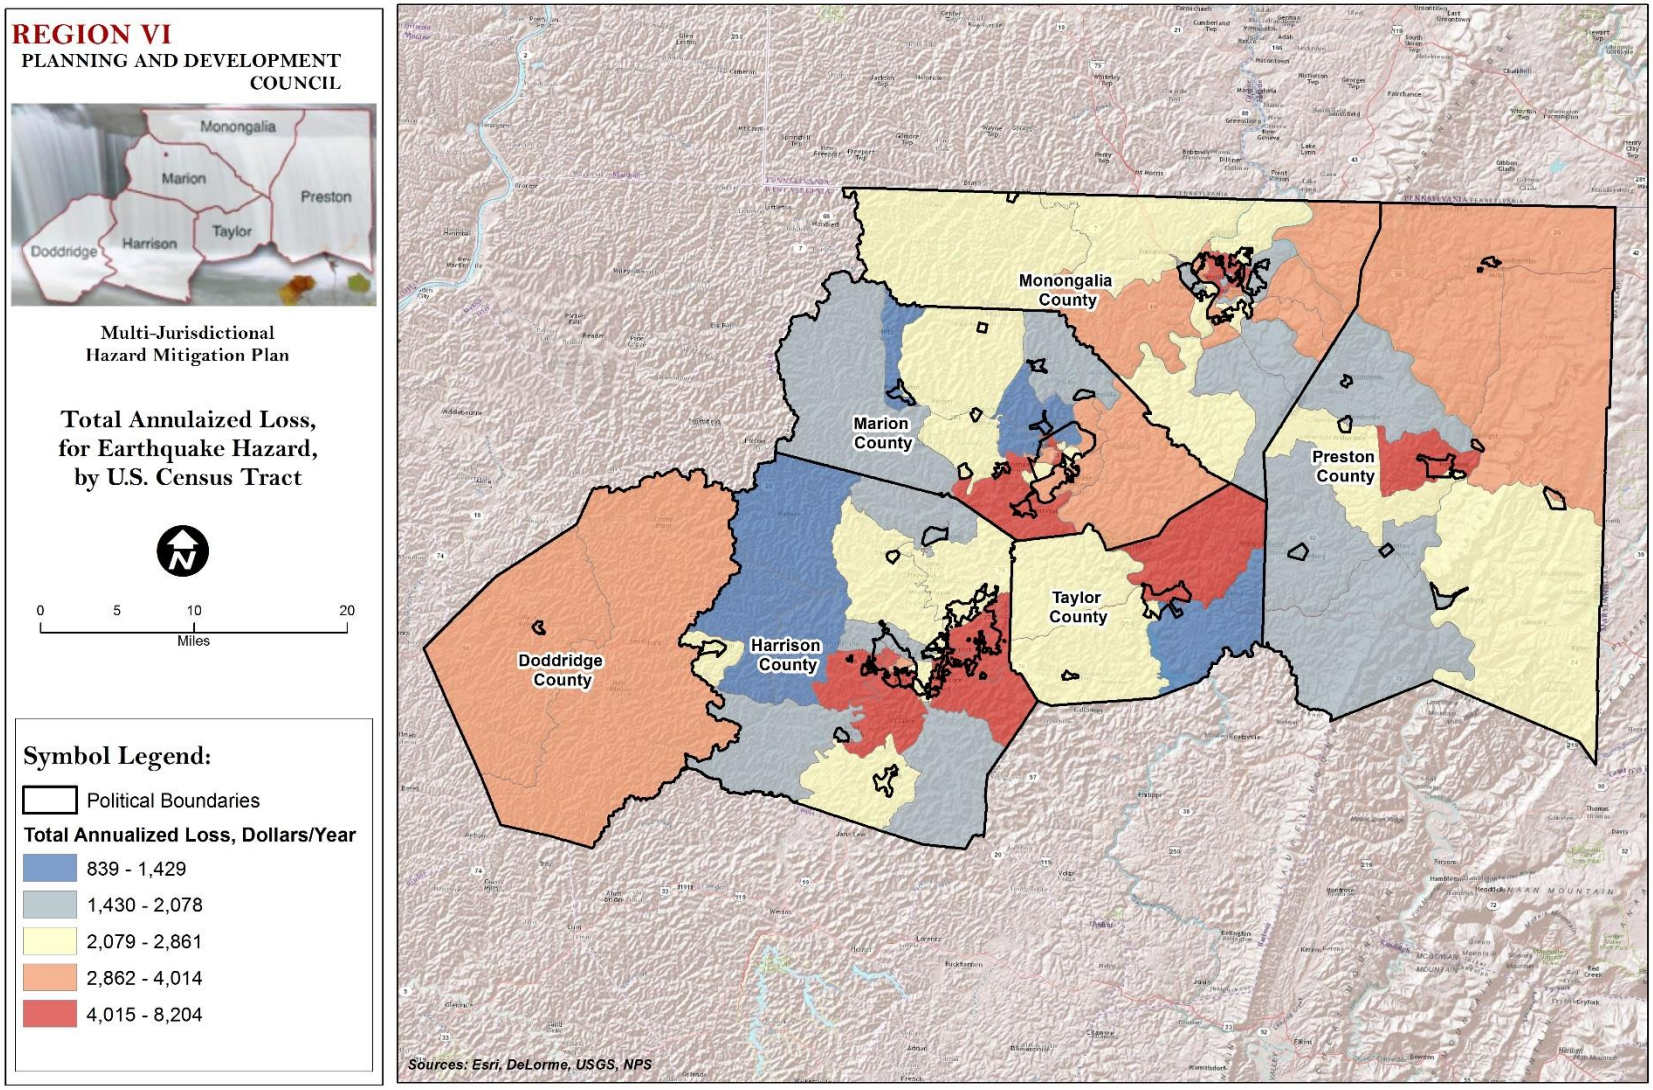

- Level 1 – Injuries will require medical attention but hospitalization is not needed.
- Level 2 – Injuries will require hospitalization but are not considered life-threatening.
- Level 3 – Injuries will require hospitalization and can become life threatening if not promptly treated.
- Level 4 - Victims are killed by the earthquake.

Map 10 – Loss Ratio for Earthquake Hazard by Community

HURRICANE HAZARD AND IDENTIFICATION OF WIND RISK

The HAZARD PROFILE of Hurricane Wind indicates a relatively low risk and Hazus-MH modeling results indicate the same. However, low risk does not indicate no risk as the PROFILE indicates that in some instances, the region may be affected by rainfall brought about by the remnants of a hurricane; therefore .

The Hazus-MH probabilistic Hurricane Wind scenario was utilized to estimate damage and loss from potential straight-line winds. More specifically, the Hazus probabilistic wind methodology is characterized by over 300,000 events and captures damage and loss estimates from sustained wind values associated with the database of storms. The HAZUS Methodology analyzes multiple probabilistic hazard frequencies ranging from the 10-, 20-, 50-, 100-, 200-, 500- and 1000-year annual chance events.

The Hazus Hurricane Wind model operates solely at the census tract-level and therefore all tract-based inventory data and subsequent modeling results have been adjusted through area-weighting to characterize the risk at the community-level. The raw tract-based inventory of exposure is depicted in MAP 11- Total Exposure By U.S. Census Tract. TABLE 8 – Total Exposure By Community below demonstrates the tract data distributed and summarized by community.

TABLE 8 – Total Exposure By Community

WVPCD6 Total			**$47,503,640,050**	**N/A**

Naturally we see all of the counties near the top of the rankings given their large geographic areas, which in many instances are on-par with the larger population centers (i.e., cities) such as Morgantown, Fairmont, Clarksburg, Bridgeport and Grafton. Furthermore, we also know that each of these cities are located within the regional primary growth areas[3] per the Regional Strategic Plan; see MAP 12- Total Exposure By Community which demonstrates the summarized distribution of exposure.

The raw Hurricane Wind probabilistic results by tract are represented by MAP 13 – Total Annualized Loss for Hurricane Wind Hazard by U.S. Census Tract. As is expected, the spatial pattern of loss are found in and around major regional population centers in Harrison County, Taylor County and Monongalia County. In addition, we see a tract in the north-eastern portion of Preston County as well as an eastern tract in Monongalia County with relatively higher losses; these tracts are likely higher due to the rotational pattern of hurricane winds in the northern hemisphere.

Raw annualized losses by tract have been summarized by community (FEMA CID) in order to determine risk for each community within the Region. Readers should be aware that Hazus does not include tables of losses for each of the individual frequency events and only reports the annualized estimate of economic loss. FEMA's Hazus –MH Probabilistic Hurricane Wind Methodology indicates the greatest risk, in terms of sheer annualized dollar losses, can be attributed to the unincorporated portions of Harrison County; see Table 9 - Hurricane Wind Total Annualized Losses By Community (Sorted & Ranked By Dollar Loss). Furthermore, we also see all six counties in the top rankings which is no surprise given the relative large area as compared to various towns and cities; see MAP 14 – Total Annualized Loss for Hurricane Wind Hazard by Community. However, if the same TEIF 2.0 data/information is normalized by the total inventory of building value in relation to the estimated total exposure within the FEMA SFHA, it can be seen that the Town of West Milford is at the greatest relative risk; see Table 10 - Hurricane Wind Total Annualized Losses By Community (Sorted & Ranked By Loss Ratio). Given the adjustment to the manner in which the data is portrayed, we can see that multiple communities in Harrison County have the greatest risk. It is unclear as to exactly why multiple communities in Harrison County are relatively higher but it could be the distribution of residential wood-type structures coupled with the probable storm paths; see MAP 15 – Loss Ratio for Hurricane Wind Hazard by Community.

Given the minimal impact to the region from the probabilistic method the Hazus summary reports do not include much content of significance. The following are notable statistics within the summary reports:

The Hazus Quick Assessment Report (QAR) indicates a relatively small number of buildings being damaged beginning at the 100-year frequency with the majority of those being residential (~85%). The chart below is an extract from the Probabilistic QAR:

Map 15 – Loss Ratio for Hurricane Wind Hazard by Community

APPENDIX H -
2018 UPDATED
HAZARD MITIGATION ACTION PLANS

REGION VI PLANNING AND DEVELOPMENT COUNCIL AREA

PROJECT NUMBER	STRATEGY	PRIORITY
PDC 1-A-1	Maintain compliance with the National Flood Insurance Program (NFIP) at the jurisdictional level by attending training, monitoring development, and ensuring that local floodplain regulations are as current and applicable as possible.	**M**
PDC 1-A-2	Undertake buyout, elevation, and/or relocation projects in the Region VI Planning and Development Council area when and if funding is available.	**M**
PDC 1-B-1	Provide financial management and grant administration services for the implementation of flood hazard mitigation projects consistent with the approved Hazard Mitigation Plan in coordination with FEMA and WV Division of Homeland Security and Emergency Management.	**H**
PDC 2-A-1	Coordinate, as appropriate, with partners throughout the region to identify the location of privately-owned dams.	**M**
PDC 2-A-2	Improve digital mapping of infrastructure in known hazard areas, including areas prone to flooding, landslides, and land subsidence.	**M**
PDC 2-A-3	Improve multi-hazard risk assessments with more detailed site-specific building inventories and hazard layers (i.e., advisory flood zones, depth grids, landslide incidences, landslide susceptibility, etc.).	**M**
PDC 2-A-4	Request and obtain historical flood/landslide event infor¬mation that pinpoints bridge and road closures from the WV DOT 511 database.	**M**
PDC 3-A-1	Undertake public outreach campaigns that better describe the risk to such hazards as earthquakes, severe wind, wildfires, etc.	**H**
PDC 3-B-1	Coordinate with critical facilities throughout the region to ensure access to National Oceanic and Atmospheric Administration (NOAA) all-hazard radios.	**M**
PDC 3-B-2	Ensure coordination with the National Weather Service (NWS) to enhance warnings of impending severe weather.	**H**
PDC 4-A-1	Continue to serve in a project management capacity for the implementation of publicly financed water and sewer infrastructure improvement expansion projects across the region.	**H**

ALBRIGHT, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-1	Conduct acquisition and relocation projects, and adopt ordinances that limit development in the floodplain.	**H**

ANMOORE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**L**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**L**

BARRACKVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on National Oceanic and Atmospheric Administration (NOAA) radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

BLACKSVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**H**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
9-A-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the West Virginia State Fire Marshal (WVSFM) to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**
9-C-2	Continue public awareness campaigns in schools, etc.	**H**

PROJECT NUMBER	STRATEGY	PRIORITY
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of a Heating Ventilation, and Air Conditioning (HVAC) failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-A-1	Assess the feasibility of cleaning up busy intersections.	**M**
16-A-2	Evaluate railroad and roadway intersections for warning systems, etc.	**M**
16-B-1	Publicize evacuation plans.	**L**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**

BRANDONVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
4-B-4	Encourage the use of National Oceanic and Atmospheric Administration (NOAA) weather radios, which continuously broadcasts National Weather Service forecasts.	**H**

BRIDGEPORT, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**M**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management.	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
1-A-8	Undertake further flood-proofing of the Bridgeport Fire Department.	**M**
3-A-1	Adopt and enforce the state building code.	**H**
3-A-2	Encourage the placement of utility lines underground for critical facilities.	**H**
3-A-3	Encourage tree trimming adjacent to utilities.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
11-A-1	Prepare annual updates of dam assessments in accordance with state law.	**M**
11-A-2	Explore state, federal, and private funding sources for dam rehabilitation.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

BRUCETON MILLS, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-F-1	Clean Big Sandy Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	**H**

CLARKSBURG, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**M**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management.	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
3-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

DODDRIDGE COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**H**
1-D-2	Instate a countywide permitting process, which will require residents and/or developers to file a permit with the county before beginning any new construction as a means of regulating floodplain development.	**H**
1-F-2	Clean portions of Middle Island Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	**H**
1-F-3	Investigate the feasibility of constructing additional flood control dams throughout the county.	**H**
1-G-1	Conduct acquisition and/or relocation projects in frequently flooded portions of the county.	**L**
1-G-2	Participate in the Community Rating System (CRS) and join the National Flood Insurance Program (NFIP) to reduce flood insurance rates.	**M**
2-B-1	Assess the number, location, strength, and ability of shelters to house residents and withstand high wind speeds. Consider constructing concrete safe rooms near mobile home parks, and other vulnerable public areas.	**H**
3-D-1	Coordinate with local private contractors to develop mutual aid agreements for emergency snow removal, also develop a Debris Management Plan that can be implemented following a disaster occurrence.	**H**
4-A-2	Encourage the use of laminated glass in window panes during all new construction.	**M**
4-B-1	Coordinate with the National Weather Service (NWS) to warn residents of impending severe storm conditions.	**M**
4-B-3	Coordinate efforts with the local media to post advance warnings of severe storms.	**M**

PROJECT NUMBER	STRATEGY	PRIORITY
4-B-4	Encourage the use of NOAA weather radios among residents that continuously broadcast National Weather Service (NWS) forecasts and provide direct warnings to the public for natural, technological, and man-made hazards.	**L**
4-B-5	Encourage authorized individuals to use the Emergency Alert System (EAS) on commercial radio, television, and cable systems to send out emergency information targeted to specific areas.	**L**
4-C-1	Coordinate with the power company to periodically trim trees near power lines to prevent limb breakage and power failures.	**L**
4-D-1	Reduce the risk of mobile home damage by suggesting the use of tie-downs with ground anchors appropriate for the soil type.	**M**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as potential damages from those earthquakes. The brochure should include information pertaining to measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**L**
5-A-2	Encourage the implementation of structural mitigation techniques such as wall bracing, reinforcing walls with fiber materials, the installation of dampers, or vibration isolation bearings in new construction.	**L**
7-A-2	Extend public water and sewer service to communities currently without service (improve infrastructure).	**H**
7-A-3	Add new pump station(s) for municipal water supply (redundant system).	**H**
8-B-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**M**
8-B-2	Encourage residents in rural areas to inspect and clean their chimneys at least once a year.	**M**
8-B-3	Encourage residents and businesses to maintain their property in or near forested areas (including short grass; thinned trees and removal of low hanging branches, cleaning of dead or dry leaves, needles, twigs, etc.), and to create a buffer zone (defensible space) between structures and adjacent forests.	**M**
10-A-1	Reduce the amount of landslides by monitoring clear-cutting operations.	**L**
10-A-2	Decrease the number of landslide occurrences around oil and gas wells by monitoring the location of the wells and drilling practices.	**M**
10-B-1	Strategically place stabilization walls in slip-prone areas along county highways.	**L**

PROJECT NUMBER	STRATEGY	PRIORITY
10-B-2	Reduce the amount of debris on roadways resulting from landslides by erecting safety fences along highways near slip- prone areas.	**L**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**H**
18-A-1	Develop and distribute an informational brochure to distribute to local residents.	**H**

FAIRMONT, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
2-A-4	Identify and make all private sector resources available in concert with the LEPC Resource Manual.	**L**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

FAIRVIEW, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pitts-burgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

FARMINGTON, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pitts-burgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

FLEMINGTON, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-K-1	Develop and conduct acquisition and relocation projects.	**M**
1-K-2	Collect updated information of the number and location of repetitive loss properties.	**H**

GRAFTON, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-K-1	Develop and conduct acquisition and relocation projects.	**L**
11-C-1	Identify the areas that would be severely flooded in the event of a severe failure of the Tygart Lake Dam and develop zoning regulations that disallow future development in those areas.	**M**
17-A-1	Encourage schools to instate and/or update procedural and evacuation plans in the event of a bomb threat.	**H**

GRANT TOWN, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**M**
2-A-1	Equip shelter facilities to provide back-up power.	**H**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**M**
2-A-5	Install lighting at the town helicopter pad for emergency night landings	**H**
3-B-1	Update resource list of contracts with snow removal agencies.	**H**
3-B-2	Acquire a backup snowplow to use during severe winter storms	**H**
4-B-1	Continue to coordinate with the National Weather Service in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**M**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**H**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**H**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**M**

GRANVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of hailstorms.	**H**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
8-B-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the WVSFM to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**
9-C-2	Continue public awareness campaigns in schools, etc.	**H**

PROJECT NUMBER	STRATEGY	PRIORITY
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of an HVAC failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-A-1	Assess the feasibility of cleaning up busy intersections.	**M**
16-A-2	Evaluate railroad and roadway intersections for warning systems, etc.	**M**
16-B-1	Publicize evacuation plans.	**L**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**

HARRISON COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management.	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-9	Encourage the preservation of land in the floodplain as passive recreation and open space.	**M**
1-A-10	Design and implement a countywide program to identify at risk structures from flooding.	**M**
1-A-11	Relocate the Wallace Fire Department to an area not in the floodplain.	**M**
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**H**
1-K-3	Catalog areas prone to flooding and poor drainage to include in potential drainage improvement plans	**M**
3-A-2	Encourage the placement of utility lines underground for critical facilities.	**L**
3-A-3	Encourage tree trimming adjacent to utilities.	**M**
3-A-4	Inventory all human and physical resources of public utilities and other public agencies, which may be utilized or shared in emergencies.	**M**

PROJECT NUMBER	STRATEGY	PRIORITY
4-A-1	Adopt and enforce the state building code.	**L**
4-A-3	Develop public awareness program regarding shelters, the Emergency Alert System (EAS), and retrofitting of existing buildings.	**H**
4-A-4	Identify and structurally analyze all buildings identified as shelters and strengthen as necessary.	**M**
4-C-2	Work with power companies to identify areas prone to power interruptions due to storms and wind events.	**M**
8-A-2	Encourage removing vegetation and combustible materials around structures.	**M**
8-A-3	Explore mechanisms for county residents to obtain fire hydrants and other fire-suppression tools.	**M**
10-A-3	Revise regulations for hillside development and landslide-prone areas in the Harrison County Subdivision regulations.	**H**
10-A-4	Assist local utilities with mapping of shutoffs and encourage planned development in event of emergency.	**M**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**H**

KINGWOOD, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
2-C-1	Construct a building over the clarifiers at the Kingwood Water Treatment Plant.	**M**
4-E-1	Construct tornado shelters near vulnerable areas, such as mobile home parks.	**L**
7-C-1	Purchase and permanently install two (2) generators at the Kingwood Water Treatment Plant.	**H**

LOST CREEK, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

LUMBERPORT, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

MANNINGTON, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
1-K-4	Develop stringent stormwater management codes for future development, possible including a stormwater utility.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

MARION COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-9	Encourage the preservation of land in the floodplain as passive recreation and open space.	**H**
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**H**
1-D-1	Use municipal regulations as models to develop a countywide permitting process to supplement the measures taken by lending institutions to monitor new construction in the floodplain.	**L**
1-D-4	Place the county floodplain ordinance on the county webpage.	**M**
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**L**
1-G-1	Conduct acquisition and/or relocation projects in frequently flooded portions of the county.	**H**
1-K-4	Develop stringent stormwater management codes for future development, possible including a stormwater utility.	**L**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure Marion County's susceptibility to technological and man-made hazards.	**L**
2-A-4	Identify and make all private sector resources available in concert with the LEPC Resource Manual.	**H**
2-A-6	Encourage local cell phone users to sign up for automated 911 emergency updates.	**M**
3-B-1	Update resource list of contracts with snow removal agencies.	**L**

PROJECT NUMBER	STRATEGY	PRIORITY
4-B-1	Continue to coordinate with the National Weather Service in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
8-B-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**L**
10-B-3	Coordinate with WVDOH to monitor the slippage repairs along U.S. Route 250 near White Hall.	**L**
10-B-4	Research measures such as retaining cables to prevent falling rock incidents along roadways.	**L**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**H**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**L**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**M**
18-A-1	Continue to distribute an informational brochure to local residents.	**L**
19-A-1	Research the possibility of lowering speed limits along accident-prone sections of I-79.	**L**
19-B-1	Make hazmat training available for emergency services responders.	**L**

MASONTOWN, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
11-C-2	Regulate development in the hydraulic shadow (or areas where flooding would occur if there was a severe dam failure of the Masontown water supply dam).	**H**

MONONGAH, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pitts-burgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

MONONGALIA COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**H**
1-D-3	Continue the implementation of countywide floodplain management.	**M**
1-G-3	Continue the development of stormwater management codes for future development outside of the City of Morgantown, where such actions are underway.	**M**
1-L-1	Work with applicable agencies to facilitate studies in repeatedly flooded areas such as Dents Run, Burroughs Run, Dunkard, Sabraton, and areas along Decker's Creek.	**M**
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
3-E-1	Institute countywide building codes and other general planning requirements, which will regulate the materials used in construction with respect to snow and ice weight.	**M**
3-E-2	Enforce existing building codes and planning requirements that are already in place.	**M**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**H**
4-D-2	Instate countywide building codes which will regulate the materials used in buildings that are constructed with respect to design wind speeds.	**M**

PROJECT NUMBER	STRATEGY	PRIORITY
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-A-3	Instate countywide building codes and other general planning regulations (including land use planning), which will regulate the number of buildings and the materials used in buildings that are constructed in slide-prone areas.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
6-B-2	Evaluate the viability of the retaining wall on Logan and Jefferson Streets in Morgantown's South Park.	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
9-A-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the WVSFM to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**
9-C-2	Continue public awareness campaigns in schools, etc.	**H**
9-C-3	Hire additional firefighters at paid-staff fire departments.	**L**
9-D-1	Continue installing wet and dry hydrants in rural portions of the county.	**L**

PROJECT NUMBER	STRATEGY	PRIORITY
9-D-2	Consider planning and subdivision regulations that will require certain levels of fire flow and potable water pressure as subdivisions are developed.	**M**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**H**
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of an HVAC failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-A-1	Assess the feasibility of cleaning up busy intersections.	**M**
16-A-2	Evaluate railroad and roadway intersections for warning systems, etc.	**M**
16-A-3	Evaluate dams and locks that plan an integral role in water transportation.	**M**
16-B-1	Publicize evacuation plans.	**L**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**

PROJECT NUMBER	STRATEGY	PRIORITY
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**
20-A-1	Increase security at large gatherings, festivals, sporting events, etc. throughout the county and municipalities. Examples include events at Mylan Park, Mountain Fest, and events at WVU.	**L**

MORGANTOWN, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
3-E-2	Enforce existing building codes and planning requirements that are already in place.	**H**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**H**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
6-B-2	Evaluate the viability of the retaining wall on Logan and Jefferson Streets in Morgantown's South Park	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
9-A-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the WVSFM to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**

PROJECT NUMBER	STRATEGY	PRIORITY
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**
9-C-2	Continue public awareness campaigns in schools, etc.	**H**
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of an HVAC failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-A-1	Assess the feasibility of cleaning up busy intersections.	**M**
16-A-2	Evaluate railroad and roadway intersections for warning systems, etc.	**M**
16-A-3	Evaluate dams and locks that play an integral role in water transportation.	**M**
16-B-1	Publicize evacuation plans.	**L**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**

PROJECT NUMBER	STRATEGY	PRIORITY
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**
20-A-1	Increase security at large gatherings, festivals, sporting events, etc. throughout the county and municipalities. Examples include events at Mylan Park, Mountain Fest, and events at WVU.	**L**

NEWBURG, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
6-D-1	Conduct a mapping project to identify old mining areas or geologically unstable terrain so that development can proceed accordingly in those areas.	**H**

NUTTER FORT, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
2-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

PLEASANT VALLEY, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pitts-burgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**M**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

PRESTON COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**1**
1-F-1	Clean portions of Big Sandy Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	**13**
1-F-4	Assess the feasibility of using the debris cleaned from the creek and streams to build an earthen floodwall along the creek to protect properties from flooding and erosion.	**9**
1-G-1	Conduct acquisition and/or relocation projects in frequently flooded portions of the county.	**8**
2-B-1	Assess the number, location, strength, and ability of shelters to house residents and withstand high wind speeds. Consider constructing concrete safe rooms near mobile home parks, shopping malls, and other vulnerable public areas.	**7**
4-A-2	Encourage the use of laminated glass in window panes during all new construction.	**12**
4-C-1	Coordinate with the power company to periodically trim trees near power lines to prevent limb breakage and power failures.	**11**
4-D-1	Reduce the risk of mobile home damage by suggesting the use of tie-downs with ground anchors appropriate for the soil type.	**15**
5-A-1	Develop an informational brochure explaining the potential for earthquakes, as well as the potential damages from those earthquakes. The brochure should include information pertaining to measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**1**
5-A-2	Encourage the implementation of structural mitigation techniques such as wall bracing, reinforcing walls with fiber materials, the installation of dampers or vibration isolation bearings in new construction.	**18**

PROJECT NUMBER	STRATEGY	PRIORITY
6-C-1	Consider developing a land use plan or modifying an existing plan to guide development away from and reduce the density of population in subsidence-prone areas.	**13**
7-B-2	Consider passing ordinances to prioritize or control water use, particularly for emergency situations such as firefighting.	**20**
7-D-1	Interconnect infrastructure systems so that one system could supply another during emergency drought conditions.	**19**
7-D-2	Provide for an emergency backup power supply at all water treatment facilities in Preston County.	**7**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**1**
11-A-3	Coordinate with the West Virginia Department of Environmental Protection, Dam Control regulations under the provisions of Chapter 22-14 of the West Virginia Dam Control and Safety Act as outlined in the West Virginia Code, to periodically reclassify any dam within Preston County as a result of a change in circumstances not in existence at the time of the initial classification to ensure adequate safety according to the potential for downstream damage.	**17**
11-A-4	Coordinate with the US Army Corps of Engineers to update outdated flood studies encompassing areas affected by the failure or topping of Significant Hazard Dams within and near Preston County, including, for example the Masontown Water Supply Dam.	**16**
13-B-1	Encourage residents to receive immunizations against communicable infectious diseases.	**5**
13-B-2	Purchase a stockpile of medications for distribution to first responders county-wide. Medications would include antibiotics and antivirals, etc. Purchase a refrigerator for storage and an alarm system and generator for temperature maintenance.	**3**
14-D-1	Purchase and install generators to provide a backup power supply for all the county's public utilities.	**6**
16-D-1	Maintain a stock of hazardous materials incident response supplies, such as clean up materials and personal protective equipment, and increase the number of personnel that are certified to conduct hazardous materials cleanups so that responders have an adequate supply to respond to multiple incidents.	**3**
16-E-1	Coordinate with personnel at facilities that store and use hazardous materials to develop and exercise site emergency plans and community response plans as required under SARA Title III.	**7**

PROJECT NUMBER	STRATEGY	PRIORITY
16-E-2	Ensure proper separation and buffering between industrial areas and other land uses such as schools, nursing homes, hospitals, etc.	**10**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**14**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**2**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**4**
17-E-1	Coordinate with local media to alert the public as to the current threat status.	**1**
17-E-2	Make arrangements or otherwise establish mass morgue facilities to be used following potential mass casualty events.	**13**

REEDSVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
4-B-4	Increase the coverage area and use of NOAA Weather Radios throughout the Town of Reedsville.	**H**

RIVESVILLE, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**L**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**M**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**H**
10-B-5	Pre-disaster mitigation of slide-prone areas which threaten critical infrastructure or utilities such as roadways, water lines, sewer lines, gas, phone, electric, internet, and cable.	**H**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**H**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**L**

ROWLESBURG, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-K-1	Develop and conduct acquisition and relocation projects.	**H**
2-C-2	Relocate the water intake upstream from the railroad river crossing.	**H**

SALEM, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
11-A-1	Prepare annual updates of dam assessments in accordance with state law.	**H**
11-A-2	Explore state, federal, and private funding sources for dam rehabilitation.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

SHINNSTON, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of structures that are repeatedly flooded.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**L**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

STAR CITY, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**H**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
9-A-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the WVSFM to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**
9-C-2	Continue public awareness campaigns in schools, etc.	**H**

PROJECT NUMBER	STRATEGY	PRIORITY
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of an HVAC failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**
20-A-1	Increase security at large gatherings, festivals, sporting events, etc. throughout the county and municipalities. Examples include events at Mylan Park, Mountain Fest, and events at WVU.	**L**

STONEWOOD, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

TAYLOR COUNTY

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-2	Continue to seek out opportunities to apply for Hazard Mitigation Assistance (HMA) funds for mitigation reconstruction, elevations, relocations or acquisitions of identified at risk, repetitive loss, non-repetitive loss, substantial damaged, partially or completely demolished or destroyed properties within the county. If mitigation reconstruction is chosen, properties identified as partially or completely demolished, outside of the regulatory floodway, as identified by available flood hazard data, will be reconstructed in accordance with the standards established in the local floodplain ordinance and in accordance with the same conditions as an elevated structure. The county will comply with all acquisition, elevation, relocation and mitigation reconstruction requirements, as per the HMA Guidance.	**1**
1-C-1	Coordinate county efforts to meet the requirements of becoming a participant in the CRS.	**4**
1-D-2	Instate a countywide permitting process, which will require residents and/or developers to file a permit with the county before beginning new construction as a means of regulating floodplain development.	**13**
1-H-1	Distribute letters to all property owners in the county regarding potential flood hazards as required for participation in the Community Rating System (CRS).	**4**
1-H-2	Hold local courses on National Flood Insurance Program (NFIP) for realtors, bankers, insurers, and municipal development officials.	**5**
1-H-3	Obtain updated information on the number of NFIP policy holders in Taylor County and its municipalities.	**3**
1-I-1	Collect updated information of the number and location of all repetitive loss properties throughout the county and the municipalities.	**2**
1-I-2	Develop a database of information on all repetitive loss properties including maps.	**7**
1-I-3	Identify owners of repetitive loss properties who are interested in participating in future property acquisition and relocation projects.	**6**
1-J-1	Work with the WV Division of Highways to identify areas of frequent roadways flooding and develop mitigation strategies.	**12**
1-K-1	Develop and conduct acquisition and relocation projects.	**16**
2-A-1	Ensure that all shelters have adequate emergency power resources.	**13**
2-B-2	Establish a protocol for the sharing of annual shelter survey information between the local American Red Cross and the TCOES.	**6**

PROJECT NUMBER	STRATEGY	PRIORITY
3-D-1	Coordinate with local private contractors to develop mutual aid agreements for emergency snow removal, also develop a Debris Management Plan that can be implemented following a disaster occurrence.	**11**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**2**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**2**
4-B-4	Encourage the use of NOAA weather radios among residents that continuously broadcast National Weather Service (NWS) forecasts and provide direct warnings to the public for natural, technological, and man-made hazards.	**3**
4-B-6	Conduct National Weather Service (NWS) Storm Spotter classes.	**7**
4-B-7	Develop an informational brochure describing proper safety procedures to following during a tornado or severe windstorm.	**1**
4-D-1	Reduce the risk of mobile home damage by suggesting the use of tie-downs with ground anchors appropriate for the soil type.	**8**
5-A-2	Encourage the implementation of structural mitigation techniques such as wall bracing, reinforcing walls with fiber materials, the installation of dampers or vibration isolation bearings in new construction.	**9**
7-B-2	Consider passing ordinances to prioritize or control water use, particularly for emergency situations such as firefighting.	**9**
7-D-2	Provide for an emergency backup power supply at all water treatment facilities in Taylor County.	**10**
8-B-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**2**
8-B-2	Encourage residents in rural areas to inspect and clean their chimneys at least once a year.	**6**
8-B-3	Encourage residents and businesses to maintain their property in or near forested areas (including short grass; thinned trees and removal of low hanging branches, cleaning of dead or dry leaves, needles, twigs, etc.), and to create a buffer zone (defensible space) between structures and adjacent forests.	**5**
8-B-4	Create displays for children's programs that teach safety. Examples of information to be used would be similar to that on the FEMA for kids CD and/or the Sparky Fire Safety Program.	**1**

PROJECT NUMBER	STRATEGY	PRIORITY
10-A-5	Instate countywide building codes, which will regulate the number of buildings constructed, the materials used in buildings that are constructed, and the locations in which buildings are constructed.	**11**
10-A-6	Develop ordinances requiring logging companies to clean and replant areas that they log. The ordinance should include the amount or replanting that is expected.	**10**
10-B-6	Work with the West Virginia University GIS Technical Center to develop detailed mapping of known and potential landslide hazard areas.	**1**
11-C-1	Identify the areas that would be severely flooded in the event of a severe failure of the Tygart Lake Dam, and develop zoning regulations that disallow future development in those areas.	**9**
11-D-1	Develop a layer to the county's available mapping showing the areas downstream of the Tygart Lake Dam to complement any structural inventory mapping that has been done. As such, county officials can easily sum the potential losses in a single dams' susceptibility area.	**8**
14-D-1	Purchase and install industrial size generators to sever as backup power at all critical utility facilities.	**7**
14-E-1	Restrict non-critical phone usage during emergency situations by instating a line-load program through the telephone company.	**6**
14-F-1	Increase the number of feeder lines into rural areas so as to create back-up electricity in the event that one of the feeder lines fails.	**14**
14-F-2	Decrease the probability of utility failures as a direct result of severe thunderstorms by coordinating with the power company to periodically trim trees near power lines to prevent limb breakage and power failures.	**11**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a large scale hazardous materials incident. Further, publicize the location and access routes to these safe zones.	**12**
16-C-1	Conduct a Tier II Assessment on the large retailers in the county to identify who should be reporting and who should not be.	**5**
16-C-2	Apply for a Hazardous Materials Emergency Preparedness (HMEP) grant from the WVDHSEM to finance the development of a Commodity Flow Study to determine what hazardous materials are used, stored, and shipped through the county.	**1**
17-A-1	Encourage schools to instate and/or update procedural and evacuation plans in the event of a bomb threat	**3**
17-B-1	Establish trauma centers at local schools and churches to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**6**

PROJECT NUMBER	STRATEGY	PRIORITY
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**15**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**6**
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**5**
17-E-1	Coordinate with local media to alert the public as to the most current threat status.	**5**
17-E-2	Make arrangements or otherwise establish mass morgue facilities to be used following potential mass casualty events.	**12**
17-E-3	Encourage county assets to instate and/or update procedural and evacuation plans in the event of a bomb threat.	**4**
17-E-4	Develop and/or enhance terrorist incident response annexes in the county Emergency Operations Plan (EOP).	**3**
17-F-1	Coordinate with local and state law enforcement to increase security at the major assets throughout the county.	**10**

TERRA ALTA, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-F-1	Consider constructing snow fences or planting rows of trees to serve as living snow fences to limit blowing and drifting snow over critical roadways.	**H**

TUNNELTON, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
6-D-1	Conduct a mapping project to identify old mining areas or geologically unstable terrain so that development can proceed accordingly in those areas.	**H**

WEST MILFORD, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-A-1	Amend floodplain ordinance for compliance with the NFIP regulations.	**H**
1-A-2	Establish procedure to amend ordinances as NFIP regulations change.	**H**
1-A-3	Establish a public education process for utilities, businesses, and residences regarding floodplain management	**H**
1-A-4	Continuation of acquisition and demolition of FEMA-identified repetitive loss structures.	**H**
1-A-5	Revise subdivision regulations to require provision for open space on land that is in the floodplain.	**H**
1-A-6	Continue and expand the intergovernmental agreement process between the county and municipalities in order to provide floodplain management by a certified floodplain manager.	**H**
1-A-7	Design and implement a countywide housing rehab program which addresses code violations, elevation, and flooding.	**H**
4-A-1	Adopt and enforce the state building code.	**H**
8-A-1	Establish a county fire board in order to provide a mechanism for county residents to obtain fire hydrants and other fire-suppression tools.	**H**
12-A-1	Continue and expand the intergovernmental agreement process amongst the county, municipalities, and other public agencies to encourage cooperation, to eliminate duplication of duties, and to provide cost-effective services to citizens.	**H**

WEST UNION, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-B-1	Conduct acquisition and relocation projects in the Town of West Union, and adopt ordinances that limit development in the flood-plain.	**L**
1-F-2	Clean Middle Island Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	**H**
3-F-1	Consider constructing snow fences or planting rows of trees to serve as living snow fences to limit blowing and drifting snow over critical roadways.	**M**
4-B-4	Increase the coverage area and use of NOAA Weather Radios throughout the Town of West Union.	**M**
7-A-2	Extend public water and sewer service to communities currently without service (improve infrastructure).	**H**

WESTOVER, CITY OF

PROJECT NUMBER	STRATEGY	PRIORITY
3-C-1	Continue outfitting and preparing the winter rescue team to ensure that emergency responders can access all parts of the county.	**L**
3-E-2	Enforce existing building codes and planning requirements that are already in place.	**H**
4-B-1	Coordinate with the National Weather Service (NWS) in Pittsburgh, Pennsylvania, to warn residents of impending severe storm conditions.	**H**
4-B-3	Coordinate efforts with local media to post advance warnings of severe storms.	**H**
5-A-1	Develop an informational brochure explaining the potential for earthquakes as well as the potential damages from those earthquakes. The brochure should include information on measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	**H**
6-A-1	Educate the public as to the benefits of building codes and overall community and land use planning as well as advantages to mitigation planning.	**H**
6-A-2	Strictly enforce ground disturbance permitting regulations, such as new MS4 requirements, in municipal and county jurisdictions.	**M**
6-B-1	Undertake active re-vegetation and other stormwater programs to cover areas of bare ground that may be susceptible to erosion.	**L**
7-B-1	Educate local residents on the benefits of conserving water at all times, not just during a drought.	**H**
8-B-1	Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	**H**
9-B-1	Continue to train and organize local fire service personnel to assist in the investigation of structural fires and the citation of code violations through a certification program made available to local fire chiefs.	**L**
9-B-2	Coordinate with the WVSFM to extend the jurisdiction of deputized fire marshals to a statewide jurisdiction.	**L**
9-B-3	Certify police departments, who have arrest powers, to handle arson investigations in place of fire departments, who do not have arrest powers (include a modified version of the State Police Academy to provide such training).	**L**
9-C-1	Facilitate public awareness campaigns aimed at recruiting more volunteers at volunteer fire departments.	**H**

PROJECT NUMBER	STRATEGY	PRIORITY
9-C-2	Continue public awareness campaigns in schools, etc.	**H**
13-A-1	Produce public awareness campaigns via various local media outlets.	**H**
14-A-1	Encourage Allegheny Power to undertake projects to increase the number of feeder lines into rural areas so as to create back- up electricity in the event that one of the feeder lines fails.	**M**
14-A-2	Encourage Allegheny Power to allow employees to take company vehicles home to be available for emergency call-outs in the event of a downed electric line. These actions will free-up local emergency responders who normally monitor the downed line.	**M**
14-B-1	Encourage representatives from the county's assets (e.g. company leaders, etc.) to draft and distribute guidelines to implement in the event of an HVAC failure.	**M**
14-C-1	Instate a grant or low-interest loan program to help individual residents finance generators and other back-up electricity systems.	**L**
15-A-1	Coordinate with local media to announce low resource/fuel supplies.	**H**
15-A-2	Increase public knowledge as to resource conservation by distributing information to new and existing customers.	**H**
16-A-1	Assess the feasibility of cleaning up busy intersections.	**M**
16-A-2	Evaluate railroad and roadway intersections for warning systems, etc.	**M**
16-A-3	Evaluate dams and locks that play an integral role in water transportation.	**M**
16-B-1	Publicize evacuation plans.	**L**
16-B-2	Facilitate the creation of safe zones as places where residents can go in the event of a hazardous material incident. Further, publicize the location and access to these safe zones.	**L**
17-A-1	Encourage schools to adopt and/or upgrade procedural and evacuation plans in the event of a bomb threat.	**M**
17-B-1	Establish trauma centers to offer medical attention and counseling to affected populations in the event of a terrorist attack.	**L**
17-C-1	Increase the knowledge of the general public concerning preparedness through the preparation of informational brochures, town meetings, training seminars, etc.	**H**
17-D-1	Coordinate with first responders for interagency cooperation to assist in collaborative planning.	**M**

PROJECT NUMBER	STRATEGY	PRIORITY
17-D-2	Continue education and training efforts of first responders and emergency personnel.	**H**
20-A-1	Increase security at large gatherings, festivals, sporting events, etc. throughout the county and municipalities. Examples include events at Mylan Park, Mountain Fest, and events at WVU.	**L**

WHITE HALL, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
2-A-1	Equip shelter facilities to provide back-up power.	**M**
10-B-3	Coordinate with WVDOH to monitor the slippage on US Route 250.	**M**

WORTHINGTON, TOWN OF

PROJECT NUMBER	STRATEGY	PRIORITY
1-E-1	Continue to educate faculty and staff at schools on NOAA radio usage.	**H**
2-A-1	Equip shelter facilities to provide back-up power.	**M**
2-A-2	Maintain and update the early warning systems that are in place throughout the county.	**H**
2-A-3	Undertake additional planning efforts to measure the susceptibility to technological and man-made hazards.	**L**
3-B-1	Update resource list of contracts with snow removal agencies.	**M**
4-B-1	Continue to coordinate with the National Weather Service in Pitts-burgh, Pennsylvania, to warn residents of impending severe storm conditions.	**M**
4-B-2	Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents.	**L**
7-A-1	Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	**L**
10-C-1	Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	**M**
11-B-1	Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	**H**

APPENDIX I -
2017 REGION VI SAMPLE NFIP SURVEYS

NATIONAL FLOOD INSURANCE PROGRAM (NFIP) SURVEY

MUNICIPALITY: MONONGALIA COUNTY, WEST VIRGINIA, MICHAEL A. PAUGH, FLOODPLAIN COORDINATOR/GIS ANALYST

1. FLOODPLAIN IDENTIFICATION AND MAPPING			
Requirement	*Recommended Action*	*Yes/No*	*Comments*
a. Does the municipality maintain accessible copies of an effective Flood Insurance Rate Map (FIRM)/Digital Flood Insurance Rate Map (DFIRM)? Does the municipality maintain accessible copies of the most recent Flood Insurance Study (FIS)?	Place these documents in the local libraries or make available publicly.	Yes	
b. Has the municipality adopted the most current DFIRM/FIRM and FIS?	State the date of adoption, if approved.	Yes	This was adopted on January 20, 2010.
c. Does the municipality support request for map updates?	If yes, state how.	Yes	Directly through FEMA
d. Does the municipality share with Federal Emergency Management Agency (FEMA) any new technical or scientific data that could result in map revisions within 6 months of creation or identification of new data?	If yes, specify how.	Yes	ARC-GIS is used for Mapping. Updates are usually in response to a flood. Morgantown Utility Board (MUB) 2010 project changed the levels.
e. Does the municipality provide assistance with local floodplain determinations?	If yes, specify how.	Yes	Use WV Flood Hazard Determination Tool and County GIS.
f. Does the municipality maintain a record of approved Letters of Map Change?	If yes, specify the responsible office.	Yes	Planning Office, Flood Plain Coordinator for County Commission records map changes.

2. FLOODPLAIN MANAGEMENT			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
a. Has the municipality adopted a compliant floodplain management ordinance that, at a minimum, regulates the following:	If yes, answer questions (1) through (4) below.	Yes	State Model Ordinance.
(1) Does the municipality issue permits for all proposed development in the Special Flood Hazard Areas (SFHAs)?	If yes, specify the office responsible.	Yes	All development is permitted through Michael A. Paugh, Floodplain Coordinator.
(2) Does the municipality obtain, review, and utilize any Base Flood Elevation (BFE) and floodway data, and/or require BFE data for subdivision proposals and other development proposals larger than 50 lots or 5 acres?	If yes, specify the office responsible.	Yes	Base Flood Elevation (BFE) is required, through Michael A. Paugh, Floodplain Coordinator.
(3) Does the municipality identify measures to keep all new and substantially improved construction reasonably safe from flooding to or above the BFE, including anchoring, using flood-resistant materials, and designing or locating utilities and service facilities to prevent water damage?	If yes, specify the office responsible.	Yes	Two feet (2') of freeboard above the Base Flood Elevation (BFE) is required. Residences – 2 feet or greater above BFE. Commercial – Flood Proof.
(4) Does the municipality document and maintain records of elevation data that document lowest floor elevation for new or substantially improved structures?	If yes, specify the office responsible.	Yes	Elevation Certificate/Certification is on file with Michael A. Paugh, Floodplain Coordinator.
b. If a compliant floodplain ordinance was adopted, does the municipality enforce the ordinance by monitoring compliance and taking remedial action to correct violations?	If yes, specify how.	Yes	Any violations are enforced with "Cease and Desist" Orders subject to $50 to $500 per day until compliant.

2. FLOODPLAIN MANAGEMENT			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
c. Has the municipality considered adopting activities that extend beyond the minimum requirements? Examples include: • Participation in the Community Rating System • Prohibition of production or storage of chemicals in SFHA • Prohibition of certain types of structures, such as hospitals, nursing homes, and jails in SFHA • Prohibition of certain types of residential housing (manufactured homes) in SFHA • Floodplain ordinances that prohibit any new residential or nonresidential structures in SFHA	If yes, specify activities.	Yes	Working with FEMA on the Community Rating System (CRS). Prohibition of production or storage of chemicals in SFHA. Prohibition of certain types of structures, such as hospitals, nursing homes, and jails in SFHA. Restrictions on residential housing (manufactured homes) in SFHA such as they must be anchored and have flood openings. Anticipate adopting the new 2018 State Model.

3. FLOOD INSURANCE			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
a. Does the municipality educate community members about the availability and value of flood insurance?	If yes, specify how.	Yes	Answers calls and specific questions. PRP – Preferred Risk Policy offering lower premiums, available to all.
b. Does the municipality inform community property owners about changes to the DFIRM/FIRM that would impact their insurance rates?	If yes, specify how.	Yes	New Preliminary Maps which indicate an eleven feet (11') rise in Hartman Run – Mon. River watershed. 52 Miles of new study.
c. Does the municipality provide general assistance to community members regarding insurance issues?	If yes, specify how.	Yes	Policy info and PRP; education on lower premium policies. The county has 162 policies in place, 60 are not in the SFHA.

NATIONAL FLOOD INSURANCE PROGRAM (NFIP) SURVEY

MUNICIPALITY: MORGANTOWN, WEST VIRGINIA, DAMIEN DAVIS, PE, CFM, CITY ENGINEER

1. FLOODPLAIN IDENTIFICATION AND MAPPING			
Requirement	*Recommended Action*	*Yes/No*	*Comments*
a. Does the municipality maintain accessible copies of an effective Flood Insurance Rate Map (FIRM)/Digital Flood Insurance Rate Map (DFIRM)? Does the municipality maintain accessible copies of the most recent Flood Insurance Study (FIS)?	Place these documents in the local libraries or make available publicly.	Yes	
b. Has the municipality adopted the most current DFIRM/FIRM and FIS?	State the date of adoption, if approved.	Yes	2010
c. Does the municipality support request for map updates?	If yes, state how.	Yes	Worked with property owners, LOMA, the 2009/2010 stream restoration project lowered the 100 year flood elevation.
d. Does the municipality share with Federal Emergency Management Agency (FEMA) any new technical or scientific data that could result in map revisions within 6 months of creation or identification of new data?	If yes, specify how.	Yes and No	They share with FEMA I the have the data. For example the 2010 HEC/RAS modeling was performed for the project that data was shared. There were also two other projects performed but no modeling was completed, so it could not be shared. CA Comm. Assessment.
e. Does the municipality provide assistance with local floodplain determinations?	If yes, specify how.	Yes	The Flood Plain Coordinator assists through the permit process, the use of the Flood Plain Determination Tool, and the FIRMs.
f. Does the municipality maintain a record of approved Letters of Map Change?	If yes, specify the responsible office.	Yes	LOMAs are filed with the Engineering Department also on the Flood Plain Determination Tool.

2. FLOODPLAIN MANAGEMENT			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
a. Has the municipality adopted a compliant floodplain management ordinance that, at a minimum, regulates the following:	If yes, answer questions (1) through (4) below.	Yes	Yes
(1) Does the municipality issue permits for all proposed development in the Special Flood Hazard Areas (SFHAs)?	If yes, specify the office responsible.	Yes	Engineering Department and CFM (Certified Flood Manager)
(2) Does the municipality obtain, review, and utilize any Base Flood Elevation (BFE) and floodway data, and/or require BFE data for subdivision proposals and other development proposals larger than 50 lots or 5 acres?	If yes, specify the office responsible.	Yes but N/A	This does not really apply to Morgantown. The largest developable areas are approximately 1 acre in size. The ordinance does have a mechanism to address this.
(3) Does the municipality identify measures to keep all new and substantially improved construction reasonably safe from flooding to or above the BFE, including anchoring, using flood-resistant materials, and designing or locating utilities and service facilities to prevent water damage?	If yes, specify the office responsible.	Yes	No freeboard is required within the ordinance. Residences at BFE. Commercial to be flood proof.
(4) Does the municipality document and maintain records of elevation data that document lowest floor elevation for new or substantially improved structures?	If yes, specify the office responsible.	Yes	Required to be submitted; records are based upon address.
b. If a compliant floodplain ordinance was adopted, does the municipality enforce the ordinance by monitoring compliance and taking remedial action to correct violations?	If yes, specify how.	Yes	They have a Code Enforcement Office, divided into zones. If in the flood plain it is referred to the Engineering Office.

2. FLOODPLAIN MANAGEMENT			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
c. Has the municipality considered adopting activities that extend beyond the minimum requirements? Examples include: • Participation in the Community Rating System • Prohibition of production or storage of chemicals in SFHA • Prohibition of certain types of structures, such as hospitals, nursing homes, and jails in SFHA • Prohibition of certain types of residential housing (manufactured homes) in SFHA • Floodplain ordinances that prohibit any new residential or nonresidential structures in SFHA	If yes, specify activities.	Yes	Community Rating System (CRS) – They work with the State Coordinator, Kevin Smeed. They have met three times in the last two weeks. They have new maps that are being provided through community Coordination and Outreach. They are all AE Zones; no A Zones in the new maps. Currently qualifies for 10% reduction. Restrictions are in place within the ordinance, not prohibitions. Within the next 18 months it will be revised to meet the 2018 model ordinance. They are also working with Heather Davis-Jenkins, Planning for Region 6.

3. FLOOD INSURANCE			
Requirement	***Recommended Action***	***Yes/No***	***Comments***
a. Does the municipality educate community members about the availability and value of flood insurance?	If yes, specify how.	Yes	During the Building Permit review this is addressed by: How to reduce through LOMA Preferred Provider Policy Pamphlets Meeting with FEMA
b. Does the municipality inform community property owners about changes to the DFIRM/FIRM that would impact their insurance rates?	If yes, specify how.	Yes	Will be with the new maps that are being produced by the WVU Tech. Center in conjunction with the County. The new maps are being provided through Community Coordination and Outreach. They are all AE Zones; no A Zones in the new maps. Sending letters to notify the land owners as to what properties have been added or removed per the 2010 project that Morgantown Utility Board performed.
c. Does the municipality provide general assistance to community members regarding insurance issues?	If yes, specify how.	Yes	If someone comes in with questions, they are addressed. They do not do proactive outreach.

APPENDIX J -
WEST VIRGINIA FLOOD TOOL INFORMATION

West Virginia Flood Tool

Quick and Easy Flood Determination Tool

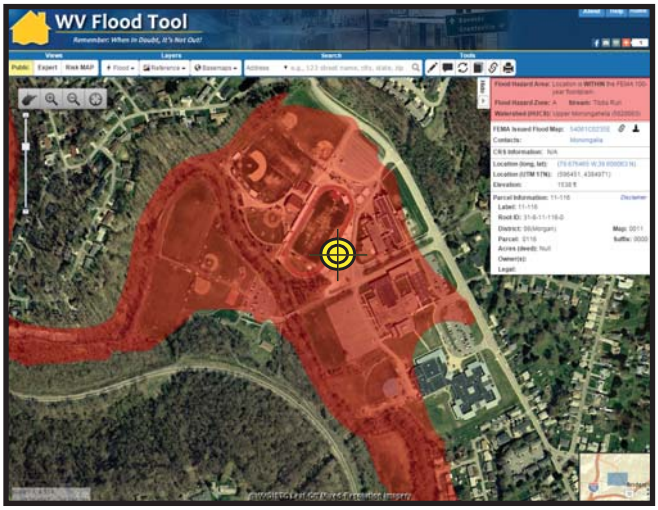

www.MapWV.gov/Flood

Information Handout

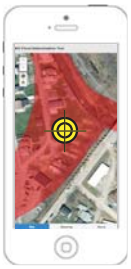

The WV Flood Tool (www.MapWV.gov) allows citizens, home owners, floodplain managers, insurance agents, developers, real estate agents, and local planers to make informed decisions about the degree of flood risk for a specific area or property through simply navigating to an area of interest and clicking on a location to query information. This application utilizes public, expert, and risk map view options to best address the needs of the user.

- View high-resolution aerial photography of urban areas at a zoomed-in map scale of 1:282 and 2'contours
- Link specific areas of the map to local floodplain managers or FEMA's online map service center to view official flood maps
- Display and query HAZUS 100-year flood event information to assist in mitigating flood risks
- Share links to Flood Tool map locations
- Display the approximate ground elevation with a vertical accuracy of +/ - 10ft
- Provide detailed flood hazard information for advanced users including base flood, elevations, cross-sections, flood profiles, mitigated properties, stream names, advisory flood heights (AFH), and downloadable models
- Access on-the-go mobile and tablet applications

Consult official FEMA flood maps and certified elevation data for further questions of if there is any doubt of a property's flood risk & contact floodplain managers for technical assistance.

1. Click on RED LAUNCH TOOL button to launch application

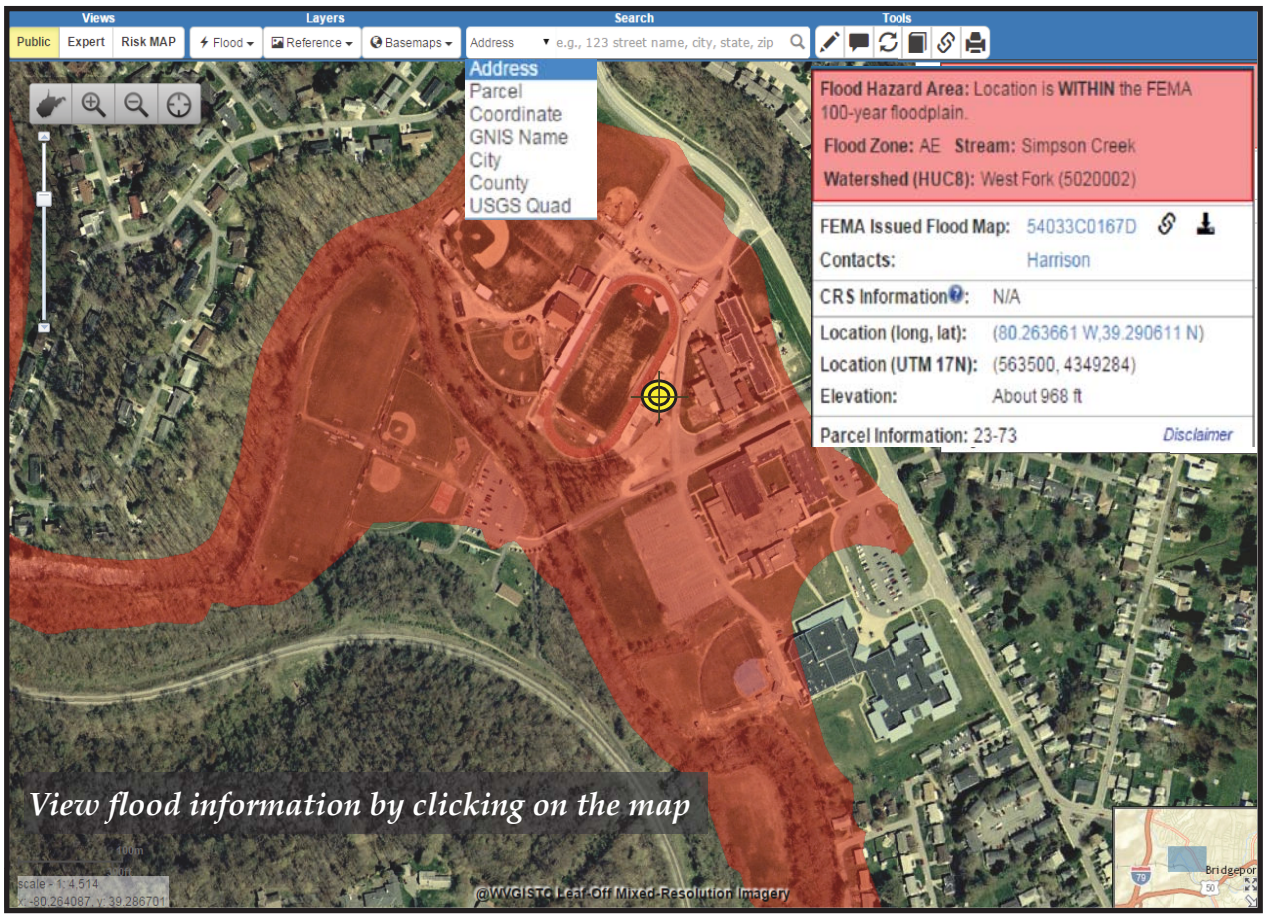

2. Find your study area by typing your address into the SEARCH box or use NAVIGATION tools to zoom to location

3. QUERY information by clicking on the map. A query results box will appear on the right side of the screen

Views | Layers | Search Box | Tools

Navigation →

← Query Results

Red areas (solid or line-filled) represent flood hazard areas

Views

Public View: Make initial food hazard estimates

Expert View: Additional data for Floodplain Managers and informed citizens familiar with detailed flood maps.

Risk MAP: Information used by communities to reduce flood risk.

Layers

Flood: Flood zone and other flood features. Change red opacity by moving slider to see underneath flood zones.

Reference: Add addresses, parcels, streets, state routes, streams, and contour lines to map view

Basemap: Chose from multiple basemaps including street maps or aerial imagery

Query Results

Click on the map to display flood results.

The query results box will display relevant flood hazard status, elevation, location, official FIRM map access link, parcels (if available), and contact information.

If your area has a detailed FIRM study, you can click on the EXPERT view and compare ground elevation with the Base Flood Elevation (BEF).

Navigation

Zoom in and out, use the cursor to pan in any direction, or hold down the shift key and left-click to draw a box to zoom to a specific area.

Click on the image of West Virginia to zoom to statewide extent.

Advisory Flood Height (AFH) Users Guide

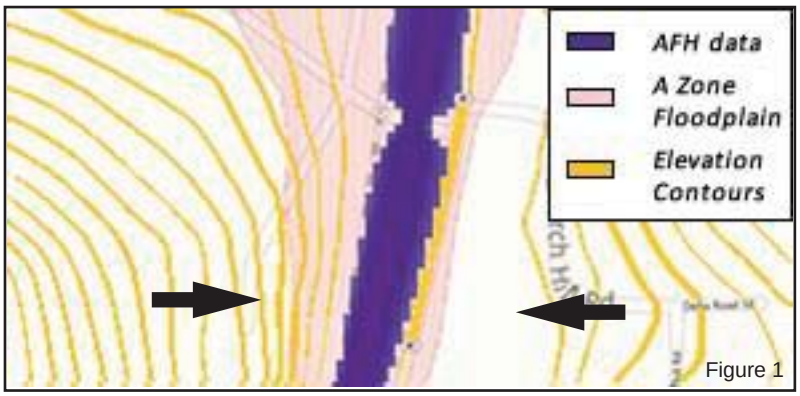

West Virginia Flood Tool
Advisory Flood Height (AFH) data

Expert View

"Improves accuracy and efficiency of floodplain management and permitting decisions"

This Fact Sheet provides information on the Advisory Flood Height (AFH) data which is available on the West Virginia Flood Tool (www.mapwv.gov/flood) for multiple counties.

The data has been developed to provide stakeholders (developers, surveyors, homeowners, floodplain managers, planners, engineers, etc.) with readily accessible flood elevations and depths in areas where that data was not previously available.

(Figure 1) AFH data better correlates with elevation data as show here comparing floodplain and elevation contours.

AFH Terminology

Advisory Flood Height

The Advisory Flood Height (AFH) is analogous to the flood water surface elevation (WSEL) used in Effective FIRMs and represents the elevation above sea level of the surface of the 1% annual chance or regulatory flood in newly modeled areas of approximate study (Zone A). AFH data are ESRI GRID format raster data, the values of which are returned in the results panel when the Flood Tool map is queried. The AFH value for a given location serves as a surrogate base flood elevation (BFE) when the latter is not available. AFH data are subject to limitations as discussed elsewhere in this document.

Advisory Flood Depth

This ESRI GRID format raster data is displayed in the Flood Tool using a color gradient to indicate the depth of the 1% annual chance flood. Depth values are reported in the results panel, along with flood zone, county, stream name and other information, when the map is queried. These depth values represent the difference between the Advisory Flood Height (flood water surface) and the ground elevation from the digital elevation model (DEM). Note that the model DEM has been processed separately from the reference DEM used in the Flood Tool, and differences in elevation values between the model and reference data sets occur in some areas. It is, therefore, not possible to obtain a reliable flood height (elevation or AFH) by adding flood depth to ground elevation. Advisory Flood Depth data in the Flood Tool should be used as a general guide or visual aid. It should not be used for making flood calculations.

AFH Benefits Summary

Improved approximate floodplain geometry

- Boundaries align with best available terrain data (2003 SAMB 3M DEM or better)
- Resolves legacy WV DFIRM conversion issues where outdated approximate floodplain boundaries don't match terrain (elevation)

Expanded coverage of flood prone areas

- Floodplains developed for all streams draining at least 2 square miles
- Communicates real risks in areas not mapped in Effective FIRMs/DFIRMs

Updated Flood Models for floodplain determinations

- USGS regression equations used to compute discharges
- Geo-referenced HEC-RAS models support AFHs
- AFHs support LOMA determinations
- Improves accuracy and efficiency of floodplain management and permitting decisions

Enhanced utility of and/or access to datasets

- Access via http://www.mapwv.gov/flood
- Depth and water surface information available
- Models can be upgraded to FEMA detailed studies
- HecRas models avaliable for download

rev. 2017-07-06

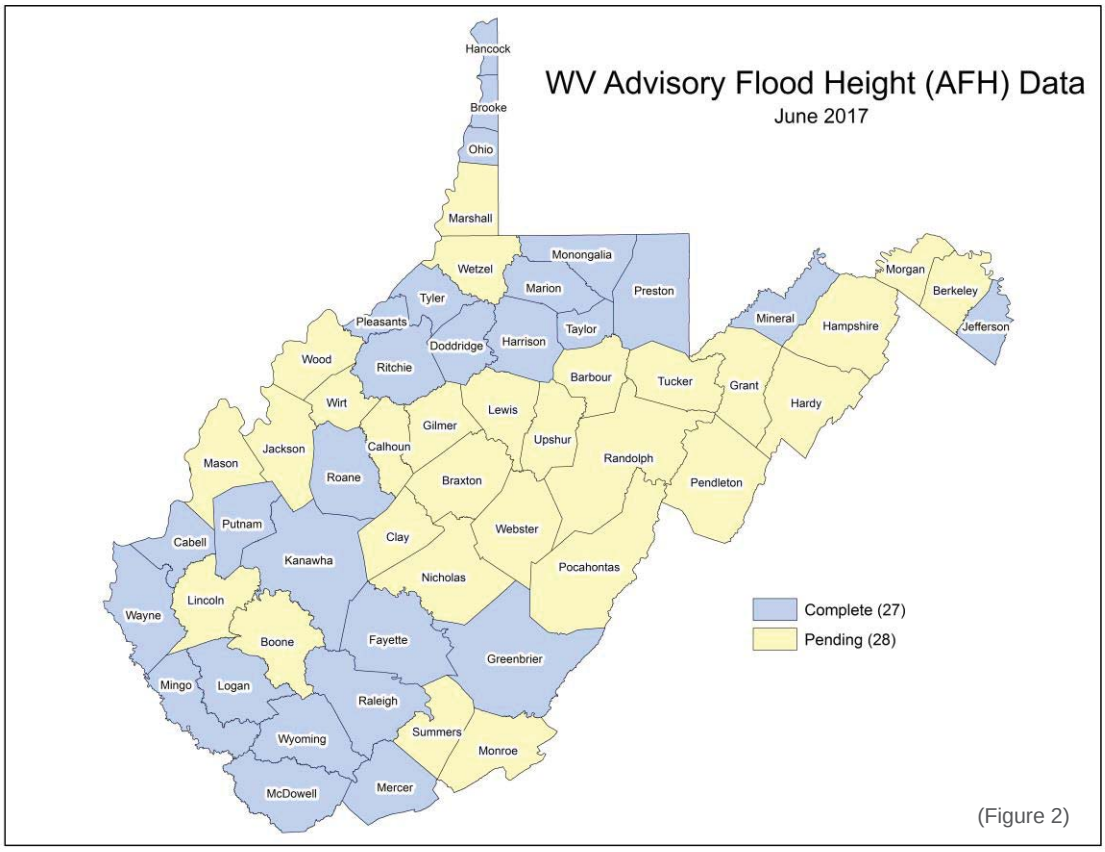

West Virginia Department of Homeland Security and Emergency Management

WV GIS Technical Center
Department of Geology and Geography
West Virginia University

FEMA

AFH Availability

AFH data is currently available in 27 West Virginia Counties. Remaining counties may be added in the future depending on the availability of funding. Refer to Figure 2 for a map of counties which currently have AFH data available. While the revised floodplain delineations associated with AFH development are anticipated to be incorporated into pending/updated Digital Flood Insurance Rate Maps (DFIRM) as best available data, they may not align with current effective DFIRM approximate flood hazard boundaries. Instead, they serve as a supplemental resource for stakeholders to assess and mitigate against the risk of flooding.

(Figure 2)

The Advisory Flood Height (AFH) floodplains used in the Flood Tool were created using established methods and data, and mimic, in batch pre-processed form, the process used by FEMA for making elevation determinations in support of Letter of Map Amendment (LOMA) processing. All floodplains developed to FEMA standards, whether they are created using methods of detailed or approximate study, are actuarial insurance instruments depicting the horizontal and vertical extent of the 1% annual chance (100-year) flood. AFH data, like the BFEs generated in detailed studies, are not supplied with a range of error but are used as the best available depiction of the elevation and depth of the 1% annual chance flood.

AFH Limitations

- No hydraulic structures (bridges/culverts/dams) considered – AFH's may be inaccurate near structures
- No reservoir routing/attenuation of flood discharges incorporated
- AFHs do not support BFEs on FEMA FIRMs
- No channel/bathymetric survey data included
- Floodplain boundaries associated with AFHs may not align with DFIRM approximate floodplains

To: Rosemary Raschella
Subject: Re: Hazard Mitigation Plan Update for the Town of Blacksville

February 30, 2018

To whom it may concern:

In response to the letter regarding the 2017 Hazard Mitigation Plan letter and attachments.

The hazard mitigation plan has been reviewed and to the best of our knowledge, there are no changes to the listed priorities.

Thank you for your assistance.

Sincerely,

Rebecca Copeland
Recorder, Town of Blacksville

On Fri, Jan 26, 2018 at 10:40 AM, Rosemary Raschella <raschella@regionvi.com> wrote:

Attached please find the 2017 Hazard Mitigation Plan Update for the Town of Blacksville. This has been sent out to the Town twice for update and review. Mayor

Attached please find the 2017 Hazard Mitigation Plan Update for the Town of Granville. This has been sent out to the Town twice for update and review. FEMA is requesting that you review these identified mitigation measures and if you have changes please update and if there are no changes please respond back to me in this e-mail that the measures are correct and you have no changes. I have to have a response in writing. This is a requirement to be eligible for any FEMA funds. If you do not participate and have a disaster you would not be eligible to apply for any FEMA funding.

Also below please let me know which apply to the Town of Granville.

Please mark the item below that applies to the Town of Granville.
If the Town has any of these in place.

Kevin,

Good afternoon, attached are the Hazard Mitigation updates that are due by the 15th. I made my plea for suggestions and help to the county and town of West Union. Not much came back. I wanted to ensure at least this much got to you before the deadline. If anything else comes in I will scan and email it to you. If you have any questions please contact me.

Thank you

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

The Region VI Planning and Development Council, working in cooperation with the WV Division of Homeland Security and Emergency Management, is in the process of updating its 2012 Multi-Jurisdictional Hazard Mitigation Plan. This plan is required to be updated every five years in accordance with Federal law. As part of the plan update process, each county and municipal jurisdiction within Region VI must review and update its mitigation action plan. The mitigation action plan for your jurisdiction, as documented in the existing 2012 Hazard Mitigation Plan, is included below. Please review each mitigation measure and its local prioritization to determine if it has been completed in the past five years. You may also elect to re-prioritize your identified mitigation measures at this time, as well as add any new mitigation measures that you feel are applicable to your jurisdiction. Please submit this completed form by July 15, 2017 to:

Kevin Starner
Skelly and Loy, Inc.
449 Eisenhower Blvd., Suite 300
Harrisburg, PA 17111
kstarner@skellyloy.com

If no response is received by July 15, 2017, we will assume that you have no changes to the identified mitigation measures or their local prioritization.

WEST UNION, TOWN OF

Strategy	2012 Priority	Has This Measure Been Completed? Yes (Y) or No	2017 Priority High (H), Medium (M), or Low (L)
Conduct acquisition and relocation projects in the Town of West Union, and adopt ordinances that limit development in the floodplain.	4	Y	L
Clean Middle Island Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	2	N	H
Increase the coverage area and use of NOAA Weather Radios throughout the Town of West Union.	1	N	M
Consider constructing snow fences or planting rows of trees to serve as living snow fences to limit blowing and drifting snow over critical roadways.	3	N	M
List any new mitigation measures here:			Priority

Town of West Union

Improve Infrastructure	H
(water, sewer + Roads) (very high!!)	

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

The Region VI Planning and Development Council, working in cooperation with the WV Division of Homeland Security and Emergency Management, is in the process of updating its 2012 Multi-Jurisdictional Hazard Mitigation Plan. This plan is required to be updated every five years in accordance with Federal law. As part of the plan update process, each county and municipal jurisdiction within Region VI must review and update its mitigation action plan. The mitigation action plan for your jurisdiction, as documented in the existing 2012 Hazard Mitigation Plan, is included below. Please review each mitigation measure and its local prioritization to determine if it has been completed in the past five years. You may also elect to re-prioritize your identified mitigation measures at this time, as well as add any new mitigation measures that you feel are applicable to your jurisdiction. Please submit this completed form by July 15, 2017 to:

Kevin Starner
Skelly and Loy, Inc.
449 Eisenhower Blvd., Suite 300
Harrisburg, PA 17111
kstarner@skellyloy.com

If no response is received by July 15, 2017, we will assume that you have no changes to the identified mitigation measures or their local prioritization.

DODDRIDGE, COUNTY OF

Strategy	2012 Priority	Has This Measure Been Completed? Yes (Y) or No	2017 Priority High (H), Medium (M), or Low (L)
Extend public water and sewer service to communities currently without service. (improve infrastructure)	22	N	H
Develop an informational brochure explaining the potential for earthquakes, as well as the potential damages from those earthquakes. The brochure should include information pertaining to measures to take to safe-proof homes and other structures from the potential effects of earthquakes.	9	N	L
Encourage the implementation of structural mitigation techniques such as wall bracing, reinforcing walls with fiber materials, the installation of dampers or vibration isolation bearings in new construction.	19	N	L
Instate a countywide permitting process, which will require residents and/or developers to file a permit with the county before beginning any new construction as a means of regulating floodplain development.	16	Y	H

Doddridge County

Clean portions of Middle Island Creek and its floodplain, clearing log jams, trees and shrubs, and sediment bars.	17	N	H
Conduct acquisition and/or relocation projects in frequently flooded portions of the county.	25	N	L
Participate in the Community Rating System (CRS), and join the National Flood Insurance Program (NFIP) to reduce flood insurance rates.	4	N	M
Coordinate efforts with the local media to post advance warnings of hailstorms.	6	Y	M
Encourage the use of NOAA weather radios among residents that continuously broadcast National Weather Service (NWS) forecasts and provide direct warnings to the public for natural, technological, and man-made hazards.	11	Y	L
Encourage the use of laminated glass in window panes during all new construction.	14	N	M
Reduce the amount of landslides in Doddridge County by monitoring clear-cutting operations.	23	N	L
Decrease the number of landslide occurrences around oil and gas wells by monitoring the location of the wells and drilling practices.	24	N	M
Strategically place stabilization walls in slip-prone areas along county highways.	12	N	L
Reduce the amount of debris on roadways resulting from landslides by erecting safety fences along highways near slip- prone areas.	7	N	L
Coordinate with the National Weather Service (NWS) to warn residents of impending severe thunderstorm conditions.	5	Y	M
Encourage authorized individuals to use the Emergency Alert System (EAS) on commercial radio, television, and cable systems to send out emergency information targeted to specific areas.	8	Y	L
Coordinate with the power company to periodically trim trees near power lines to prevent limb breakage and power failures.	18	Y	L
Coordinate with the National Weather Service and local media to warn residents of impending severe winds and possible tornado conditions.	1	Y	L

Doddridge County

Reduce the risk of mobile home damage by suggesting the use of tie-downs with ground anchors appropriate for the soil type.	20	N	M
Assess the number, location, strength, and ability of shelters to house residents and withstand high wind speeds. Consider constructing concrete safe rooms near mobile home parks, and other vulnerable public areas.	21	Y	H
Coordinate with local private contractors to develop mutual aid agreements for emergency snow removal.	10	N	H
Develop and distribute an informational brochure to distribute to local residents.	3	N	H
Distribute information concerning the leading causes of wildfires and steps the general public can take to avoid starting wildfires.	2	N	M
Encourage residents in rural areas to inspect and clean their chimneys at least once a year.	15	N	M
Encourage residents and businesses to maintain their property in or near forested areas (including short grass; thinned trees and removal of low hanging branches, cleaning of dead or dry leaves, needles, twigs, etc.), and to create a buffer zone (defensible space) between structures and adjacent forests.	13	N	M

List any new mitigation measures here:	Priority
Addition of Flood Control Dams in	
A few areas of the County	H
Addition of New Pump Station(s) for	
Municipal water Supply (Redundant system)	H

(this is to go Along with extending water to Surrounding Communities)

REGION VI PLANNING AND DEVELOPMENT COUNCIL
2017 HAZARD MITIGATION PLAN UPDATE

July 12, 2017 Update with newly elected Mayor, The Honorable Trevor Waters

The Region VI Planning and Development Council, working in cooperation with the WV Division of Homeland Security and Emergency Management, is in the process of updating its 2012 Multi-Jurisdictional Hazard Mitigation Plan. This plan is required to be updated every five years in accordance with Federal law. As part of the plan update process, each county and municipal jurisdiction within Region VI must review and update its mitigation action plan. The mitigation action plan for your jurisdiction, as documented in the existing 2012 Hazard Mitigation Plan, is included below. Please review each mitigation measure and its local prioritization to determine if it has been completed in the past five years. You may also elect to re-prioritize your identified mitigation measures at this time, as well as add any new mitigation measures that you feel are applicable to your jurisdiction. Please submit this completed form by July 15, 2017 to:

Kevin Starner
Skelly and Loy, Inc.
449 Eisenhower Blvd., Suite 300
Harrisburg, PA 17111
kstarner@skellyloy.com

If no response is received by July 15, 2017, we will assume that you have no changes to the identified mitigation measures or their local prioritization.

RIVESVILLE, TOWN OF

Strategy	2012 Priority	Has This Measure Been Completed? Yes (Y) or No	2017 Priority High (H), Medium (M), or Low (L)
Use municipal regulations as models to develop a countywide permitting process to supplement the measures taken by lending institutions to monitor new construction in the floodplain.	1	**Yes – Town has a permitting process; not sure about County**	**Low**
Continue to educate faculty and staff at schools on NOAA radio usage.	2	**No for Town; not sure about County**	**Low**
Coordinate with the Soil Conservation Service to continue updating the map showing areas that would be affected by a dam failure.	2	**No for Town; not sure about County**	**Low**
Update resource list of contracts with snow removal agencies.	3	**Town have a mental list, will**	**Medium**

		document it onto paper.	
Establish procedures with companies to clean up material from a landslide quickly and to monitor areas of high risk.	4	**No for Town; not sure about County**	**High**
Continue to coordinate with the National Weather Service in Pittsburgh, Pennsylvania to warn residents of impending severe thunderstorm conditions. 4-B-1	3	**Yes for Town; Also Smart phones get these weather alerts automatically.**	**Low**
Continue to monitor and maintain the three (3) rain gauges installed at strategic points throughout the county. Use these gauges in conjunction with the new weather station to monitor current and developing weather incidents. 4-B-2	5	**No for Town; Believes Yes for County**	**High**
Develop plans and schedules with the Department of Agriculture to haul water to residents during drought conditions.	5	**Yes for Town; Incident Specific, the County usually provides the Water Buffalos.**	**High**
Equip shelter facilities to provide back-up power.	3	**Yes for Town.**	**Medium**
Maintain and update the early warning systems that are in place throughout the county.	2	**Yes for Town and County; Also Smart phones get these alerts automatically.**	**Medium**
Undertake additional planning efforts to measure Marion County's susceptibility to technological and man-made hazards.	5	**No for Town; not sure about County**	**Medium**
List any new mitigation measures here:			Priority
Pre-disaster mitigation of slide prone areas which threaten critical infrastructure or utilities such as roadways, water lines, sewer lines, gas , phone, electric, internet, and cable.			**High**

Kevin,

Per our phone conversation and your email, please find attached a copy of the 2017 Hazard Mitigation Plan you sent me along with my corrections. I could only find two things that I feel would pertain to us. 10-B-3, which is something that we've been keeping track of, and 2-A-1, which our current and our future facility can act as a shelter and our plans are to have back-up power. Both can remain as Medium priority. If there's any questions or concerns, don't hesitate to get back with me.

Thanks.

Hi Rosemary,

The City of Shinnston has had the opportunity to review the mitigation measures and their prioritization for the next five years. As stated in July, I do not see the revision of our Subdivision Standards to include open space as a "High" priority; however, this is not a major concern to have it removed or changed on the current plan.

We are fine with the written measures as they are stated. Please let us know if you need any additional information.

Respectfully,
Amy
